Journalist	19/01/2022	Please provide details as to the number of applications and referrals to CAMHS (Child and Adolescent Mental Health Services) in 2021 and 2020 that were *not* progressed - ie, they were not deemed to fit the criteria; or they were referred to another service; or other reasons were proffered as to why CAMHS was not the suitable service to deal with the child in question. Where possible, please provide a breakdown as to the *main* reasons for not accepting a case into CAMHS (eg, referral to another service, such as disability, or that there was no diagnosed mental illness or other required diagnosis presented or provided, etc etc). Please provide the age span of these cases that were not progressed, eg, the age of the youngest child, and the age of the oldest (I would guess that is 17). Where possible, please outline the extent of or number of or level of these cases that were not progressed or accepted into CAMHS in which suicidal ideation was mentioned as being experienced by the young person. Please, where possible, provide data as per each CHO area. Finally, if any of these aforementioned young people were *later* accepted for treatment within CAMHS, please outline the number of those cases and the timespan between the initial refusal and then their entry into CAMHS services, within the aforementioned two-year timeframe.
