January 2023 Below Target: -56 WTE (-0.0%)

- Work continues on profiling the 2023, 6,010 WTE Target.
- The final 2022 outcome was marginally shy of target at -77 WTE.

Staff Category:

- For January 2023 Management & Admin, Nursing & Midwifery and General Support are all ahead of the 2023 target with the remaining staff categories reporting a lag.
- **The net effect is a very marginal lag of -56 WTE.**

Division:

- Acute services are ahead of target in 4 of the 6 staff categories (+83 WTE overall)
- Community services are behind at -186 WTE overall, with the largest variance reported in Patient & Client Care
- National & Central Services are +46 ahead of profile.

Turnover 2019 - 2022

Comments

The Turnover figure of 10.2% has been significantly influenced by Covid-19 factors including international travel re-opening and any retirement or decisions to leave the HSE being deferred in the past couple of years. Comparing it to previous years, there are significant increases of +2.5% compared to 2021 (7.7%), +3.5% compared to 2020 (6.7%) and +4.3% compared to the 2019 turnover rate (5.9%).

Between Q1 2019 and Q4 2022 the average headcount increased by 13%.

The charts indicate that the Turnover Rates (%) were broadly the same from Q1 2019 to Q2 2021. Since then however we have seen turnover increase significantly over time.

2022 in particular has seen a dramatic increase in the % turnover rate (and the number of leavers) increasing by 1% in Q1, 0.8% in Q2, 0.6% in Q3 and increasing by 0.1% in Q4 respectively comparing to 2021 data.

While the rate has slowed throughout the year, turnover has increased by 2.5% overall to a full yearly Turnover Rate of 10.2%.

Notes:

Turnover is calculated by the numbers of leavers in a period divided by the Average Headcount in that period.

Leaver numbers and Health Service turnover is distorted by the multiplicity of employers /payrolls where staff leaving one employer but remaining within the service are included in the statistics. In addition to normalise this rate the calculation for Registrars and SHO's/Interns (the majority of whom are on rotation within the services) and Pre-Registration Nursing and Midwifery Internship students where, a) their contract has ended and b) may continue in employment as staff nurses have been adjusted to take account of these rotations/ movement (adjusted from the calculation to provide an adjusted rate. Therefore the rate provided excludes these cadres of staff as they are expected movement within services for reasons related to their training / education programmes) .
