

Sligo General Hospital has a **NO SMOKING** policy. Smoking and the use of tobacco products in the hospital are prohibited for all patients, staff and visitors within 6 metres of all entrances, exits, windows and ventilation systems.

We as a Healthcare organisation, would encourage you not to smoke at all. If, however, you really wish to smoke, two designated Smoking Shelters are provided close to the Main Entrance of the hospital and in the Out Patient Car Park area, outside of the Coffee Dock.

Support and treatment is available from our Smoking Cessation Officer for anyone wishing to stop smoking.
