

STOP IT FOR YOU

**PREGNANT? ASTHMA? HEART DISEASE?
CANCER? OBESITY? DIABETES?
LONG-TERM ILLNESS?**

People who have conditions like these are more at risk from Swine Flu than other people.

Getting the Swine Flu vaccine will protect you from Swine Flu and will also stop it spreading to people around you.

Everyone aged from 6 months to under 65 years in these At-Risk Groups should talk to their GP about getting a Swine Flu Vaccine now. It's free of charge.
