

What will you get?

During this module you will:

- Review core consultation skills using the Calgary-Cambridge Guide;
- Consider how these skills need to be applied with greater depth and intensity in challenging consultations;
- Describe and demonstrate key skills needed for challenging consultations in a safe setting;
- Reflect on and identify key skills you wish to practice to enhance your skills for challenging consultations.

How will you be supported?

A range of adult learning methodologies will be used including classroom-based modules, role play, reflective practice and group work.

MODULE 3

Challenging Consultations

Module 3

Challenging Consultations

This workshop supports participants to learn and develop communication skills to deal with challenging patient-clinician communication: responding to strong emotions, delivering bad news, disclosing errors and many other difficult clinical conversations.

Educational methods

The workshops are grounded in educational theory, evidence-based best practice and experiential learning. Participants' own experiences in healthcare and the collective experiences of the group are used to enhance learning.

DATE AND TIME:

This activity has been approved for 5 CPD Credits

Context

Research evidence indicates that a healthcare team member's communication skills can have a profound impact on healthcare outcomes and on the experience of care for patients and their families. The ability of healthcare staff to listen, explain and empathise can influence the patient's capacity to follow through with treatment recommendations and empower patients and their families to find solutions to their health challenges. In addition, communication among healthcare team members can encourage good working relationships, job satisfaction and improve patient safety.

National Patient Experience Survey

The Results of the National Patient Experience Survey (NPES) provide acute hospital services in Ireland with tangible evidence about what matters to patients and their families, about their journey through Irish Hospitals and identifies areas for improvement.

The Programme

This Programme is designed to support healthcare staff to take a skilled, sensitive and person-centred approach to all conversations with patients, their families and with colleagues. The Programme is under-pinned by the Core Values of Care, Compassion, Trust and Learning.

How will it be delivered?

The Programme modules are short, intensive and practical. Delivery of the modules over nonconsecutive days will allow participants to do some on-the-job reflection between modules. In-house facilitators come from Acute Hospitals with support from the National Programme.
