7th December 2018

Deputy Louise O'Reilly
Dail Eireann

PQ 47042/18* To ask the Minister for Health the number of assaults on healthcare staff in hospitals in each of the years 2008 to 2017, by number of assaults and the hospital in which the assault took place in tabular form; and if he will make a statement on the matter.

Dear Deputy O'Reilly,

I refer to your Parliamentary Question 47042/18 which was forwarded to the HSE for response.

Background

With regard to the above PQ, please see below the report on HSE Assaults on Staff. Your Parliamentary Question requests data from 2008 to 2017 (which was previously requested in PQ 17212/18) and therefore, we have taken the liberty of including the years 2008 to 30th November 2018.

To assist with understanding the report/data more fully, I feel it appropriate to firstly give a brief background to the National Incident Management System (NIMS) and to the data in the report. In 2015 the NIMS system was introduced by the SCA. This requires all incidents to be reported through a national centralised system and will ultimately improve the quality of the data. However, the HSE has long been proactive in encouraging staff to report all incidents and this is enshrined in the Corporate Safety Statement, Violence and Aggression policy and Incident Management Framework and Guidance.

An incident can be a harmful Incident (Adverse Event), no harm incident, near miss, dangerous occurrence (reportable circumstance) or complaint.

Please note that the following conditions apply to the data:

- Table 1 shows the data broken down by Hospital Group Location
- All assaults on staff are included
- Assaults include a problem/cause of: physical, verbal or sexual assault on staff in the HSE Hospital Groups (excluding voluntaries), that occurred between 2008 and 30/11/18
- The report was run by "Date of Incident", which is the date on which the incident occurred and is between 01/01/2008 and 30/11/2018
- This report is correct as of 07/12/2018
- Create date is as of the 30/11/18

When considering the figures in the report it should be noted that staff are encouraged to report all "near misses" and incidents – even those that **do not** result in harm. Hence, the number of incident reports

should not be considered as indicative of a level of harm. There may also be multiple reports relating to the same incident.

Table 1: HSE Hospital Group Assaults on Staff by the date incident occurred 2008 – 30 November 2018

Location At Level 2	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Grand Total
Group 1 - RCSI Dublin North East Hospital Group (Academic Partner: RCSI)	361	286	183	242	228	83	285	220	235	172	195	2,490

Comment

The figures show that there is a level of annual fluctuation in the reported incidents, however we would anticipate a rise in the number of recorded incidents as NIMS becomes further embedded in the system and the organisation continues to encourage the reporting of all incidents (regardless of the level of harm, if any).

Ensuring the safety of employees and service users is a priority concern for the HSE. The HSE is committed to creating a safe environment within which to work or to be treated.

There is an emphasis on training and equipping the workforce effectively with skills on risk identification and the management of violence and aggression.

Training in relation to the Management of Violence and Aggression is offered in all services.

The organisation will be placing a renewed emphasis on the management of work related aggression and violence in 2019 to support the organisational strategy and recently updated policy.

I trust this will answer your query however, please do not hesitate to contact me should you have any further queries.

Yours sincerely

A handwritten signature in black ink, appearing to be 'NJP', written over a horizontal line.
