

17/12/2019

Deputy Stephen Donnelly
Dáil Eireann,
Leinster House,
Kildare Street,
Dublin 2.

PQ 50891/19 - To ask the Minister for Health the number of persons in each LHO area waiting for an ophthalmology appointment in primary care at the end of November 2019 or the latest date available; and the number waiting 0 to 12, 12 to 26, 26 to 52 and more than 52 weeks, respectively in tabular form

-Stephen Donnelly

Dear Deputy Donnelly,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for response.

Ophthalmology is one of a range of multi-disciplinary services provided through Primary Care in Community Healthcare Organisations. Eye care in Ireland encompasses a range of services including HSE directly provided services and contracted primary care services. HSE directly provided services includes vision surveillance and screening at birth, preschool and primary school in addition to assessment, diagnosis and treatment of visual impairment and other ocular pathologies in adults and children. The latter services are provided by Primary Eye Care/Ophthalmology teams comprised of a number of eye care specialists.

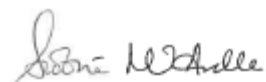

Please find attached Appendix 1 which contains, in tabular form, details of the waiting list for Ophthalmology in community services as of October 2019. Please note that November waiting list data as requested will not be generated until the end of December.

Please note that where there is a zero in a particular field in most instances this means that the Ophthalmology service in the LHO is provided in an acute hospital setting or the waiting list data for that LHO is combined with and submitted by another LHO. The zeroes for Meath is because the data for that LHO was not returned in October. It is important to note that the overall total in the attachments represents the entirety of the waiting lists. The HSE is working to ensure timely access to children and adults requiring ophthalmology services, and to reduce long waiting times for this important service.

The HSE is committed to delivering efficient high quality ophthalmology services to all eligible service users. In 2018 there were 101,405 attendances at HSE community ophthalmology clinics.

I trust this information is of assistance to you.

Yours Sincerely,

Siobhán McArdle,
Head of Operations Primary Care,
Community Operations
