

7th July 2020

Deputy Róisín Shortall, TD
Dáil Éireann
Leinster House
Kildare Street
Dublin 2

RE: PQ 12286/20

To ask the Minister for Health the number of patients under 65 years of age by county treated for foot ulcerations which did not require a full or partial limb amputation in 2019; the number of patients that had diabetes; and if he will make a statement on the matter

Dear Deputy Shortall,

The Health Service Executive has been requested to reply directly to you in relation to the above parliamentary question, which you submitted to the Minister for Health for response. I have consulted with the National Clinical Programme for Diabetes on your question and have been informed that the following outlines the position.

County	2019	
	Cases with foot ulcer without amputation, aged under 65 years	Cases with foot ulcer without amputation, aged under 65 years, with diabetes
Carlow	21	12
Cavan	45	23
Clare	42	26
Cork	125	73
Donegal	22	7
Dublin	596	260
Galway	44	24
Kerry	29	18
Kildare	47	36
Kilkenny	15	10
Laois	19	7
Leitrim	10	~
Limerick	55	43
Longford	24	14
Louth	96	29
Mayo	28	19
Meath	86	52
Monaghan	16	7

Offaly	18	12
Roscommon	12	~
Sligo	26	16
Tipperary	22	14
Waterford	46	33
Westmeath	22	14
Wexford	68	42
Wicklow	220	204

Notes:

- The figures quoted include data from all publicly funded hospitals which were included on the Hospital In-patient Enquiry (HIPE) system during 2019.
- In-patient and day case discharges are reported only; ED and Out-patient attendances are not recorded on HIPE. Patients of No Fixed Abode or not normally resident in Ireland have been excluded. It is important to note that this data is based on hospital discharges only and does not include patients undergoing treatment who are not admitted to hospital. Furthermore, the data is based on hospitalisations which may include multiple admissions for the same patient. Therefore the data presented here cannot be construed as an estimate of the prevalence of the treatment specified.
- For every discharge HIPE captures a principal diagnosis and up to 29 additional diagnoses, and up to 20 procedures, in addition to administrative and demographic information. Diagnosis and Procedures are coded using ICD-10-AM/ACHI/ACS (from 2015 8th edition is used). ICD-10-AM is the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification. The ICD-10-AM disease component is based on the World Health Organisation (WHO) ICD-10. ICD-10-AM is used in conjunction with the Australian Classification of Health Interventions (ACHI), and the Australian Coding Standards (ACS) to reflect an accurate health episode of care.
- The Healthcare Pricing Office does not report cells where the number of discharges reported to HIPE is between 1 and 5. In this output, such cells have been presented as ~.

Definitions used:

- Full or Partial lower limb Amputation: any procedure with a code of 44367-01 Disarticulation at knee, 44367-02 Amputation below knee, 44370-00 Amputation at hip, 44373-00 Hindquarter amputation, 44367-00 Amputation above knee, 44338-00 Amputation of Toe, 44358-00 Amputation of toe including metatarsal bone, 90557-00 Disarticulation through toe, 44361-00 Disarticulation through ankle, 44364-00 Midtarsal amputation, 44364-01 Transmetatarsal amputation, 44361-01 Amputation of ankle through malleoli of tibia and fibula
- Diabetes: any diagnosis with a code of E10 Type 1 Diabetes, E11 Type 2 diabetes, E13 Other specified diabetes mellitus, E14 Unspecified diabetes mellitus
- Foot Ulcer: any diagnosis of L97 Ulcer lower limb NEC, E10.73 Type 1 diabetes mellitus with foot ulcer due to multiple causes, E11.73 Type 2 diabetes mellitus with foot ulcer due to multiple causes, E13.73 Other specified diabetes mellitus with foot ulcer due to multiple causes, E14.73 Unspecified diabetes mellitus with foot ulcer due to multiple causes
- Age Under 65: Restricted to patients aged less than 65 at discharge

- County: The county of residence code identifies the place where the person would normally reside, i.e. 'home address'. Those from a foreign country that are now resident in Ireland would have a code assigned for where they now live in Ireland.

Additional Information from NCP Diabetes:

Limb loss is one of the most devastating complications of diabetes and represents an enormous burden on individuals, their families and on the health and social care system in general. Reducing the number of diabetes-related amputations is a major goal of the National Clinical Programme (NCP) for Diabetes. Over the past number of years, the HSE has appointed 31 new diabetes specialist podiatrists. The first 22 of these posts have been deployed in the acute (hospital) setting with a focus on dealing with the management of patients with active foot disease. The National Clinical Programme for Diabetes is aware of many examples of excellent multidisciplinary care pathways that have been put in place around these new hospital podiatry appointments with local audits demonstrating improved decision making and reduction in length of stay for complex diabetic foot patients. The most recent HSE specialist podiatry appointments have been made in primary care. Each Community Health Organisation now has at least one community-based podiatrist assigned to provide care to patients at risk of future ulceration or limb loss.

I trust this information is of assistance to you but should you have any further queries please do not hesitate to contact me.

Yours sincerely,

Patricia Gilsenan O'Neill
General Manager
