Deputy Pádraig O'Sullivan,  
Dail Éireann,  
Leinster House,  
Kildare Street,  
Dublin 2.  
e-mail: [padraig.osullivan@oireachtas.ie](mailto:padraig.osullivan@oireachtas.ie)

Dear Deputy O'Sullivan,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

**PQ: 34971/20**

*To ask the Minister for Health when families caring for young persons with intellectual disability will be able to avail of respite in their own county; and if he will make a statement on the matter.*

**HSE Response**

The HSE and its funded Agencies provide respite care to children and adults with disabilities. Respite can occur in a variety of settings for various lengths of time, depending on the needs of the individual service user, the family and according to available resources. Respite is not always centre-based and can be provided in a number of ways, e.g. Centre based; In-Home; Home-to-Home; Family Support, etc. As a vital part of the continuum of services for families, respite potentially helps prevent out-of-home full-time residential placements, preserves the family unit, and supports family stability.

The HSE is very much aware of the importance of respite service provision for the families of both children and adults with disabilities, including the impact the absence of respite service provision can have on other services.

**2020 Developments**

Prior to the public health emergency with regard to COVID-19 and in accordance with the National Service Plan 2020, the HSE was committed to provide 33,712 day only respite sessions and 166,183 nights (with or without day respite) to people with disabilities in 2020. In addition, the HSE will provide 144 intensive transitional support packages for children and young people with complex / high support needs, which will include planned residential respite interventions and access to planned extended day / weekend and summer day based activities.

The presence and threat of COVID-19 in Ireland has resulted in significant challenges for service providers, families and most importantly, people with disabilities. During these challenging times disability services and supports such as residential services, day services, home supports, Personal Assistant supports, respite services and children's services were either suspended or delivered in alternative ways in line with Public Health guidance. The HSE is aware that the changes in service delivery have resulted in significant stressors being placed on families and individuals with disabilities across Ireland.

The delivery of Respite Services continued to operate during the pandemic, albeit at a reduced capacity; some centres remained open, while others were temporarily re-purposed as isolation facilities. Throughout the pandemic, staff and resources associated with closed or curtailed services were redeployed where possible to support residential

Service

provision and to provide for targeted in-home, community and tele-/online supports for service users and families based on prioritised needs. The HSE was also mindful of the will and preference of people in terms of receiving services and in certain instances where personal choice was made to put these services on hold.

### Resumption of Disability Services

In respect of the provision of Disability Services and in the context of the Governments Resilience & Recovery Framework (2020 – 2021), the HSE regards the provision of disability services, including respite provision, as essential to maintaining a response to people with a disability.

All disability services must follow public health guidance in this area, including the prevention and management of covid related infection. The HSE and its funded disability partners will continue to provide supports, including respite services, in line with public health guidance and direction and having regard to the availability of staffing resources.

Reference is drawn to the following HSE weblink which provides updates and guidance for disability service providers, including 'service resumption planning guidance'.

The HSE and Service Providers recognise the critical need and importance of disability supports for people and their families. The impact of COVID-19 on people's lives has and continues to be very significant. Our collective aim is to restore services and to ensure continuity of services in a safe way in line with the very significant investment made by the State and funded agencies. We continue to work with service users and their families/carers to ensure that we achieve this aim.

In this context, we welcome the recent announcements from the Government of additional funding for Disability Services:

- An additional €100 million secured for Disability Services in the recent budget.
- €10 million is being made available to support the resumption of day services and enhanced home support services for disability service users. The €10 million funding is being drawn down from the National Action Plan on COVID-19 - €7.5 million will increase the level of day service provision and €2.5 million will provide intensive support packages for children and young people with complex/high support needs.
- €20 million in one-off grants will be provided to reform disability services, build the capacity of disability organisations and to improve the quality of life of those who rely on these services.
- €7.8 million has been allocated by Sláintecare to facilitate the HSE and its funded service providers to address the overdue Assessments of Need.

Yours sincerely,

**Dr. Cathal Morgan,**  
**Head of Operations - Disability Services,**  
**Community Operations**
