

19 October 2020

**Deputy David Cullinane
Dáil Eireann
Leinster House
Kildare Street
Dublin 2**

PQ 28159/20 To ask the Minister for Health the impact of the Covid-19 pandemic on dental and orthodontic services waiting lists; the number of persons waiting 0 to 6, 6 to 12 months, 1 to 2, 2 to 3 and 3 plus years at the end of quarter 2 and 3 2020 compared to quarter 2 and 3 2018 and 2019, by LHO in tabular form; and if he will make a statement on the matter.

Dear Deputy Cullinane,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for response.

I wish to advise that the system does not hold data in the manner requested. Appendix 1 and Appendix 2 detail KPI data for the Dental (2018-2020) and Orthodontic Service (2018-2020).

Access to dental services was restricted to urgent /emergency treatment under the terms of Statutory Instrument 121/2020 (28th March 2020 -18th May 2020). An emergency dental service was maintained in all HSE service areas throughout this time, which included remote consultation through telephone triage as well as clinical attendance for treatment.

During that time, and since, many HSE dental staff have been redeployed to testing and tracing as part of the HSE's response to the pandemic.

Elective Dental Services have been gradually resuming. All service locations are implementing social distancing and other organisational measures as well as infection prevention and control guidance from the Health Protection Surveillance Centre that has been updated during the pandemic. Some of these measures mean that the usual throughput of patients is reduced at the start of the resumption, but this is expected to improve over time. HSE dental staff members have been provided with appropriate Personal Protective Equipment (PPE) during the pandemic.

In locations where dental services share waiting areas and other facilities, all services are working together to ensure that services are delivered safely and effectively. As part of their resumption plan, each dental area is restarting their screening and treatment service for children. Clinicians have reviewed the records of patients that were under treatment at the time when services were phased down. Priority for early appointments has been given to patients that need to be seen urgently, and following up where necessary on cases that had emergency treatment during the restricted access period.

The period of restricted access to elective activity has had an adverse effect on waiting lists and times. This is reflected in a 65% reduction in scheduled dental assessments in the first three quarters 2020. If there had been no pandemic, based on the 2019 data, it is estimated that 29,110 children would have been seen for dental examinations during the restricted period (28th March until 18th May). This figure does not include possible additional attendances for treatment after examination.

Full assessment of the impact on waiting lists of the restricted access period, reduced throughput on resumption, and the ongoing commitment to testing on the backlog in service provision is being undertaken. Reducing waiting times is a key priority for the HSE, while at all times ensuring that services implement the organisational and preventive measures required to reduce the risk of Covid-19 transmission.

I trust this information is of assistance to you, but if you require further clarification please do not hesitate to contact me.

Yours Sincerely,

Joseph Green
