Deputy Bernard Durkan,  
Dail Eireann,  
Leinster House, Kildare Street,  
Dublin 2.  
e-mail: [bernard.durkan@oireachtas.ie](mailto:bernard.durkan@oireachtas.ie)

Dear Deputy Durkan,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

#### **PQ 3527/21**

*To ask the Minister for Health the extent to which he expects to improve the supports for children with special needs while requiring therapeutic or residential short-term or long-term assistance; and if he will make a statement on the matter.*

#### **HSE Response**

The HSE and disability service providers recognise the critical need and importance of disability supports for children with special needs and is very much aware of the importance of service provision, such as Respite, Therapeutic Supports and Home Support, for the families of children with disabilities. The impact of COVID-19 on people's lives has and continues to be very significant. Our collective aim is to restore services and ensure continuity of services in a safe way and in line with the very significant investment made by the State and funded agencies.

#### **Respite Services**

Prior to the public health emergency with regard to COVID-19 and in accordance with the National Service Plan 2020, the HSE was committed to provide 33,712 day only respite sessions and 166,183 nights (with or without day respite) to people with disabilities in 2020.

The delivery of Respite Services continued to operate during the pandemic, albeit at a reduced capacity; some centres remained open, while others were temporarily re-purposed as isolation facilities. The number of respite overnights is currently operating at just over 50% of the NSP target 2020; while the number of day only sessions is operating at 56% of 2020 target. Throughout the pandemic, staff and resources associated with closed or curtailed services were redeployed where possible to support residential provision and to provide for targeted in-home, community and tele-/online supports for service users and families based on prioritised needs.

At present, centre-based respite facilities are generally providing services at 40 to 60 percent occupancy levels due to necessary precautions to maintain physical distancing and to adhere to infection prevention and control requirements. The majority of centres are open on a reduced capacity basis due to physical distancing requirements. In a very small number of cases, certain centres remain closed or continue to be used for isolation purposes, subject to the prevailing local incidence of infection, but the HSE continue to work with providers locally to maximise both centre-based and alternative non-residential respite and support option to provide target support, wherever possible.

## In-home Supports

In addition, the HSE committed to provide 144 intensive transitional support packages for children and young people with complex / high support needs, to include planned residential respite interventions and access to planned extended day / weekend and summer day based activities. However, at end of December 2020, a total of 857 intensive home support packages were developed across the 9 CHOs. The significant increase on the NSP target is indicative of the requirement for additional in-home services to compensate for the reduction in the delivery of traditional respite services. Children with special needs also benefited from traditional Home Support Services, the provision of which remained steady during 2020.

## Children's Therapeutic Services

The HSE acknowledges the challenges in meeting the demand for children's therapeutic services and is acutely conscious of how this impacts on children and their families. The HSE is also fully cognisant of the stress that waiting times for early intervention services can cause to families.

A number of service improvements are being introduced that, when implemented, will help improve access to services for children with disabilities and developmental delays. The overall programme of improvement is the ongoing roll out of Progressing Disability Services for Children and Young People (PDS). The HSE is establishing a total of 91 Children's Disability Networks across the nine CHOs, each comprised of one specialist inter-disciplinary Children's Disability Network Team (CDNTs) to work with children aged from birth to 18 years with complex disability needs. This requires the reorganisation of all current HSE and HSE funded children's disability services into geographically-based CDNTs.

PDS is doing this by forming partnerships between all the disability organisations in an area and pooling their staff with expertise in the different types of disabilities to form the CDNTs. These teams will provide for all children with significant disability, regardless of their diagnosis, where they live or where they go to school.

This reconfiguration of services under the Progressing Disability Services for Children & Young People (PDS) programme is in line with Health Service Reform and the implementation of Community Healthcare Networks under Sláintecare.

## Developments in 2021

The HSE welcomes the recent announcements from the Government of additional funding for Disability Services:

- An additional €100 million secured for Disability Services in the recent budget. The specific breakdown of this investment will be discussed as part of the normal service planning process and will be detailed in the National Service Plan. However, the HSE anticipates that significant funding will be allocated for Early Intervention and School-aged Services, as well as the development of additional Respite Services and in-home intensive transitional support packages.
- €10 million is being made available to support the resumption of day services and enhanced home support services for disability service users. The €10 million funding is being drawn down from the National Action Plan on COVID-19 - €7.5 million will increase the level of day service provision and €2.5 million will provide intensive support packages for children and young people with complex/high support needs.
- €20 million in one-off grants will be provided to reform disability services, build the capacity of disability organisations and to improve the quality of life of those who rely on these services.
- €7.8 million has been allocated by Sláintecare to facilitate the HSE and its funded service providers to address the overdue Assessments of Need for children and young adults with disabilities.

Yours sincerely,

**Dr. Cathal Morgan,**  
**Head of Operations - Disability Services,**  
**Community Operations**
