Re: PQ ref 13483/21

“To ask the Minister for Health the capacity of the IT system used to record vaccines administered; if the IT system is capable of processing upwards of 40,000 records per day as will be required in April 2021 in order to meet the target of 1.2 million vaccinations that month; and if he will make a statement on the matter.”

Dear Deputy Shortall,

The system purchased is the Salesforce system and we have been assured that it is capable of processing well over 40,000 records a day. The HSE is working closely with both IBM and Salesforce to implement the system.

If you feel that the question has not been fully answered or you require any further clarity, please contact me.

Yours sincerely,

Fran Thompson,
Interim Chief Information Officer, OoCIO, HSE.
