

Catherine Connolly, T.D.  
Dáil Éireann,  
Leinster House,  
Kildare Street,  
Dublin 2.

7<sup>th</sup> April, 2021

PQ: 14598/21

**To ask the Minister for Health the engagement he has had with the HSE regarding the inclusion of the FreeStyleLibre flash glucose monitoring system on the HSE reimbursement list; the analysis that has been carried out by the HSE into the possible reimbursement of the device; and if he will make a statement on the matter. -Catherine Connolly**

Dear Deputy Connolly,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question (Reference 14598/21), which you submitted to the Minister for Health for response.

Whilst it was anticipated that the review of FreeStyle Libre Flash Glucose Monitoring System would be finalised at the end of Q1 2020, the public health emergency that has occurred in the meantime has resulted in members of the Health Technology Assessment Group (HTAG), whose primary roles are in Public Health Medicine, being redirected fully to public health emergency duties. Given the current situation, the HSE are not in a position to provide an exact date for completion of the HTAG review and publication of the advice note. The HSE needs to consider this information before a decision regarding further funding / reimbursement of FreeStyle Libre sensors is made.

Consultant Endocrinologists / Diabetes Nurse Specialists may apply to the HSE, on behalf of specific patients, for reimbursement support of FreeStyle Libre Flash Glucose Monitoring (FGM) sensors. This includes those persons with Long Term Illness (LTI) eligibility. The application process is undertaken by means of a dedicated online portal, which has been operational since 3rd April 2018. In line with the recommendations outlined of the Health Technology Assessment Group, access to this product was made available to children and young adults (4 -21 years). However, the application process does cater for the Consultant to make an application in very exceptional circumstances for a type 1 diabetic patient outside of this group

Yours sincerely,
