30 March 2021

Deputy Neale Richmond
Dáil Éireann
Leinster House
Dublin 2.

PQ 16413/21 * To ask the Minister for Health the number of persons that were treated for knife related injuries in Irish hospitals in each of the years 2015 to 2020; and if he will make a statement on the matter.*

Dear Deputy Richmond,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted for response.

The attached table was provided to me by the Healthcare Pricing Office (HPO) which is responsible for managing and reporting data from the Hospital In-Patient Enquiry (HIPE) System. The HIPE System is a health information system designed to collect medical and administrative data regarding discharges from, and deaths in, acute public hospitals.

Please note that HIPE does not collect Emergency Department or out-patient data. The figures attached therefore pertain only to patients who were admitted to hospital as a result of their injury. The figures do not include patients who were treated entirely in the ED as the HIPE system does not capture this information.

Please note that they are only in a position to provide 2015 - 2019 as data for 2020 is not complete and subject to change.

I trust that this is of assistance.

Yours sincerely,

Carol Ivory
General Manager, Acute Operations
