8th December 2021

Deputy Sean Sherlock,
Dail Eireann,
Leinster House,
Kildare Street,
Dublin 2.
E-mail: sean.sherlock@oireachtas.ie

Dear Deputy Sherlock,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary questions, which were submitted to this department for response.

PQ: 58071/21

To ask the Minister for Health the number of children aged zero to 18 in each CHO by individual area, awaiting first-time intervention in all areas of early intervention; the number on the public list; the number on the CDNT list in each CHO in tabular form; and the length of time they are awaiting intervention by age.

PQ: 58072/21

To ask the Minister for Health the number of children who have completed assessment, intervention and completed therapies by age in each CHO in tabular form.

HSE Response

The HSE acknowledges the challenges in meeting the demand for children's disability services and is acutely conscious of how this impacts on children and their families.

Children requiring interventions including health and therapy services, such as Speech and Language Therapy, Occupational Therapy, Physiotherapy, Psychology and other therapy services would access services through Primary Care Teams in CHO Areas as well as through Children's Disability Services.

Whilst accepting that significant levels of vital therapies were temporarily curtailed due to the current Covid-19 pandemic, the restoration and continuity of services is underway in a safe way in line with the very significant investment made by the State and funded agencies. We continue to work with service users and their families/carers to ensure that we achieve this aim.

HSE Disability Services does not gather data on services provided through other service areas such as Primary Care and in the case of some interventions required by children, Acute Services and Child and Adolescent Mental Health Services.

While it is not possible to give information on the number of children aged zero to 18 awaiting first-time intervention in all areas of early intervention or on the number of children who have completed

assessment, intervention and completed therapies, Primary Care Operations has compiled the latest available waiting list data, on services for which they collate data, for the end of October 2021 for those aged 0 to 17 years and 11 months.

- Table 1 in the Appendix includes the data for Psychology - Number of 0-17 years & 11 months old Patients waiting for treatment October 2021.
- Table 2 in the Appendix includes the data for Occupational Therapy - Number of 0-17 years & 11 months old Patients Awaiting First Time Assessment October 2021.
- Table 3 in the Appendix includes the data for Physiotherapy - Number of 0-17 years & 11 months old Patients waiting for Assessment October 2021.
- Table 4 in the Appendix includes the data Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Assessment - October 2021.
- Table 5 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Therapy - October 2021.
- Table 6 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Further Therapy - October 2021
- Table 7 in the Appendix includes the data for Dietetics - Number of 0-17 years & 11 months old patients waiting for treatment October 2021.
- Table 8 in the Appendix includes the data for Ophthalmology - Number of 0-17 years & 11 months old Patients waiting for treatment October 2021
- Table 9 in the Appendix includes the data for Audiology - Number of 0-17 years & 11 months old Patients waiting for treatment October 2021

Progressing Disability Services for Children & Young People (PDS)

A number of service improvements are being introduced that, when implemented, will help improve access to services including therapy services for children with disabilities and developmental delays.

The implementation of the Progressing Disability Services for Children & Young People (PDS) programme is agreed Government and HSE policy. This policy supports the reconfiguration of children's disability services to provide equitable, child and family centred services based on need rather than diagnosis. The PDS programme will ensure that services are provided for children with complex needs regardless of where they live or where they go to school.

The Progressing Disability Services for Children and Young People (PDS) model addresses the previous inequity in service provision whereby there may have been an excellent service for some children and little or no service for others. This variance may have been linked to diagnosis, age group or geography. Under the PDS programme children's disability services are changing from diagnosis based to needs based, so that all children with a disability or developmental delay have access to the right service based on their needs no matter where they live.

The National Policy on Access to Services for Children & Young People with Disability & Developmental Delay ensures that children are directed to the appropriate service based on the complexity of their presenting needs rather than based on diagnosis. Many children and adults with a disability who have support needs can be effectively supported within mainstream child and adult health services. This policy will provide a single point of entry, signposting parents and referrers to the most appropriate service (Primary Care for non-complex functional difficulties and Children's Disability Network Teams for complex functional difficulties).

The HSE is committed to the full implementation of the Progressing Disability Services for Children and Young People Programme (PDS). PDS is a significant change programme for the provision of services and supports for children from birth to 18 years of age, in line with Sláintecare and the Programme for Government, in order to:

- Provide a clear pathway and fairer access to services for all children with a disability
- Make the best use of available resources for the benefit of all children and their families
- Ensure effective teams are working in partnership with families and with education staff to support children with a disability to reach their full potential.

PDS aligns with two clear objectives of The Sláintecare Report to:

- Provide the majority of care at or as close to home as possible
- Create an integrated system of care with healthcare professionals working closely together.

Children's Disability Network Teams (CDNTs)

In line with the PDS model, resources assigned to children's disability services are allocated to the 0 – 18 Children's Disability Network Teams (CDNTs) rather than to a dedicated early intervention team or dedicated school age team.

91 Children's Disability Networks (CDN) are aligning to 96 Community Healthcare Networks (CHNs) across the country and each Children's Disability Network will have one CDNT providing services and supports for children aged from birth to 18 years of age. Early Intervention Teams and School Age Teams already in place are reconfiguring into 0-18 CDNTs. On full reconfiguration of children's disability services into CDNTs, every child across the country with complex needs arising from their disability will have access to a Children's Disability Network Team.

CDNTs are teams of health and social care professionals, including nursing, occupational therapy, psychology, physiotherapy, speech and language therapy, social work and others. The team works closely together in a family centred model, focusing on the child's and family's own priorities. Once all teams are in place, every child with complex needs will have access to a team, regardless of the nature of their disability, where they live, or the school they attend.

Children and their families will have access to the full range of services and supports of the CDNT according to their individual needs. This includes universal, targeted and specialist supports, such as individual therapeutic intervention and access to specialist consultation and assessment when needed. Supports will be provided as is feasible in the child's natural environments - their home, school and community.

The first step for all areas is the reconfiguration of existing staff resources into CDNTs. The staffing mix available in each area will be influenced by the historical development of services. For example, some areas may have a significant number of nurses available for reconfiguration, others may have family support workers or early educators.

Since 2019, 285 development posts have been allocated to children's disability services across the country. This is broken down as follows:

- 100 posts provided in NSP 2019
- 100 posts provided in NSP 2021
- 85 posts for services in special schools approved mid 2021

The range of posts recruited / in recruitment in 2021 include; dietitians, occupational therapists, physiotherapists, psychologists, speech & language therapists, nurses and some administrative support. These posts have been assigned based on a number of factors, including the existing ratio of staff to the number of children with disabilities in each area.

The special school posts were approved by the Minister of State for Disabilities to facilitate the provision of in-reach services to those special schools that have heretofore provided a school based service. These staff members will be employed as part of the new CDNTs and will report to the Children's Disability Network Manager. CHOs will ensure that the allocation of any posts to CDNTs are targeted towards providing appropriate interventions.

Services in most parts of the country have now reconfigured to CDNTs. The remaining teams will be established before the end of 2021, thereby all 91 CDNTs will be in place and delivering services at that time.

Historically the number of children waitlisted in each organisation providing children's disability services has not been available nationally. A National Management Information System for all 91 CDNTs is in development and when implemented, will provide current data on waiting lists for all CDNTs.

A child and family centred service model is being implemented across all teams, which will focus on the child and families own prioritised goals and an Individual Family Service Plan including the CDNTs services and supports to enable the child and family to achieve their goals, CDNTs prioritise the team's waitlist and caseloads based on need. The provision of equitable services by a CDNT will inevitably mean that some children will receive less than they may have done previously in order to accommodate children with disabilities who have not received services previously.

Yours sincerely,

Bernard O'Regan
Head of Operations - Disability Services,
Community Operations
