Dublin 2

04/10/2021

PQ 45110-21- Deputy Michael Fitzmaurice – To ask the Minister for Health when the community operations programme will commence which was agreed in 2018 as part of a range of services that were to be put in place for families who were caring for children impacted by exposure to sodium valproate and to date no family has availed of such service; and if he will make a statement on the matter.

Dear Deputy Fitzmaurice,

Thank you for your representation. Foetal valproate syndrome (FVS) is a recognised clinical condition and diagnostic criteria has been developed to assist in identifying it. Where children or adults have been exposed to valproate in utero, there is concern that they may have FVS, either because of the presence of congenital malformations, or a developmental disorder. To date there has been two advanced nurse practitioners appointed as part of the pregnancy prevent programme. In addition to create capacity in the service, the HSE focused on setting up an dedicated FVS diagnostic clinics, prioritising patients where there is a referral with a query of FVS. The capacity building exercise included the funding and the appointment of a 5.8wte posts which included a Consultant Paediatrician, Consultant Geneticist, Administration Support, Laboratory Geneticist, Advanced nurse practitioner posts and a data manager. In addition the HSE has sought funding for the remaining 4 advanced nurse practitioners as part of the 2022 estimate process

I hope this provides you with assistance.

Yours sincerely,

Sharon Hayden
