

Pearse Doherty, T.D.
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

26th April 2022

PQ: 20113/22

To ask the Minister for Health the position regarding the reimbursement of the FreeStyle Libre continuous glucose monitoring system for those with type 1 diabetes; if he has considered extending the availability to all persons over 21 years of age with type 1 diabetes; and if he will make a statement on the matter. -Pearse Doherty

Dear Deputy Doherty,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question (Reference 20113/22), which you submitted to the Minister for Health for response.

The HSE requested that the National Centre for Pharmacoeconomics (NCPE) carry out a full Health Technology Assessment (HTA) on Freestyle Libre. The company Abbott were formally notified of this on April 13th 2021. Abbott had a scoping meeting with the NCPE in July 2021 and committed to submitting their HTA Dossier for end of October 2021. However, Abbott informed the PCRS that they would not be submitting the HTA dossier on 15th November 2021 because they did not have the level of Randomized Controlled Trials (RCT) evidence that they stated was required for a full HTA process. Despite the HSE emphasising the importance of engaging with the HTA to progress, the company will not be progressing with the HTA. In the preparation of the National Service Plan, the HSE considered all of the service priorities to be delivered against all of the resources made available to it. Additional funding for extension of Freestyle Libre to other cohorts was not provided in the National Service Plan 2022. In the absence of a full value assessment of the product, the HSE is not in a position to remove the age restriction. However, the online application process does cater for the Consultant to make an application in very exceptional circumstances for a type 1 diabetic patient who is over 21 years of age.

Yours sincerely,
