Ref: WM/PQ's/220511

11th May 2022

Deputy Cathal Crowe
Dáil Éireann
Leinster House
Dublin 2

PQ20793/22 *To ask the Minister for Health if he will provide an overview of the resourcing of the National Ambulance Service by county; and if he will make a statement on the matter. - Cathal Crowe*

Dear Deputy Crowe,

The Health Service Executive (HSE) National Ambulance Service (NAS) has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response.

NAS is the statutory Pre-Hospital and Intermediate Care Service (ICS) provider for the state. The service has over 100 locations, over 200 staff and a fleet of over 600 vehicles. Since 2015, NAS staffing has increased by over 500 staff and the NAS fleet has increased by 21%.

In 2021, NAS responded to over 366,000 ambulance calls; the ICS transports approximately 40,000 patients per annum via Intermediate Care Vehicles (ICV); co-ordinates and dispatches more than 800 aeromedical calls; and completes 600 paediatric/neonatal transfers. In the Dublin metropolitan area, ambulance services are provided by both the NAS and Dublin City Council Dublin Fire Brigade (DFB).

Every day, the NAS deploys approximately 160-180 emergency ambulances, an average of 22 Rapid Response Vehicles (RRV) and in excess of 50 Officer Response Vehicles (ORV) operating from locations around the country. All emergency ambulances are on duty, there are no on call arrangements.

As part of the National Ambulance Service (NAS) Fleet and Equipment Replacement plans, the NAS Fleet, Logistics and Support (FLS) Office has managed to increase its capital spend. This means that NAS have been able to achieve its current policy targets of vehicle replacement of every 5 years or at 350,000kms per Emergency Ambulance (EA).

This is based on guidelines adopted internationally. Many other Ambulance Services internationally opt for a relatively short, five years, life for their Emergency Ambulances in order to maintain reliability and reduce the risk of in-service breakdowns

The NAS has implemented an 8 week inspection schedule for all patient carrying vehicles which has significantly improved the performance, safety and reliability of our fleet.

It should be noted that all NAS resources are dynamically deployed to calls across the country on a nearest available (to the incident) basis and not on a county boundary basis to respond to incidents as they arise to ensure the nearest available resource responds to emergencies.

Oifig anStiúrthóir

e director.nas@hse.ie

As demand can exceed available resources, 112/999 calls are clinically triaged and prioritised to ensure that those patients with life threatening injuries or conditions receive the fastest response possible. If a 112/999 call is not time critical, then during busy periods, these calls will wait longer for a response. Thankfully, it remains the case that the majority of 112/999 calls do not relate to life threatening emergencies.

NAS operational areas are divided into three regions, North Leinster, West and South. The table below list all available Emergency Ambulance (EA) resources across the three NAS operational areas, the NAS also utilise RRV, ORV, ICV, Motorbike Response Units (MRU) and Aeromedical services. In the Dublin metropolitan area the DCC/DFB have fourteen EA's operational in conjunction with the NAS resources.

I hope that this information is helpful.

Yours sincerely

William Merriman
Deputy Director
National Ambulance Service
