Dublin 2.

15th December 2022

PQ Number: 62840/22

PQ Question: To ask the Minister for Health if he will provide an update of the rollout of the eating disorder network and the implementation of the HSE National Model of Care Plan for eating disorders; the target operational dates for the remaining adult and CAMHS teams for eating disorders; and if he will make a statement on the matter. -Mark Ward

Dear Deputy Ward,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response. I have examined the matter and the following outlines the position.

Eating disorders have the highest mortality and morbidity within mental health and they pose significant health, social and economic cost to people with eating disorders, to their families and to society. In January 2018 the HSE published a National Model of Care for Eating Disorders (MOC) in partnership with College of Psychiatrists' of Ireland and Bodywhys. The NCPED aims to establish an ED network (8 adult teams and 8 CAMHS teams) in accordance with the agreed Model of Care 2018. CAMHS ED team staffing is recommended at WTE 14.4 per 500,000-600,000. Adult ED Team staffing is recommended at WTE 13.4 per 500,000-600,000

Since 2016 over €8 million has been made available for Eating Disorder posts through programme for government funding. In 2020 mental health development funding was required to meet unfunded cost growth in mental health services. As a result nationally planned developments of eating disorder services had to be temporarily paused. Some of the paused funding was used for agency staffing (both medical and nursing) and to facilitate specialist placements for those with complex mental health needs including eating disorders. This was done in consultation with the Department of Health. Funding (2016-2019) was made available again in 2021 to start the 2nd phase of teams.

There are currently 3 eating disorders (ED) specialist teams in operation, 2 CAMHS teams serving Cork Kerry Community Healthcare (CHO4) and Community Healthcare Dublin South, Kildare and West Wicklow (CHO7) and an adult team in Community Healthcare East (CHO6). These multidisciplinary

teams provide specialist eating disorder assessment and treatment in the community and are the foundations of delivering quality eating disorder care across the stepped model of care.

Funding was made available again in 2021 to start the 2nd phase of teams in CHO4 (adult), CHO9 (adult) and CHO2 (CAMHS). Recruitment of MDT teams requires 12-18 months duration in line with HSE recruitment procedures. The CHO 9 Adult ED team has been recruited and aims to be accepting referrals in Quarter 1 of 2023. Recruitment of staff to CHO 2 (CAMHS) and CHO 4 (Adult) teams has progressed well and is also nearing completion, however the consultant psychiatrist appointments remain outstanding following initial recruitment campaigns. Interviews were held in (November 2022) for the consultant psychiatrist for the adult CHO 4 team and with a successful candidate, this team will be operational in 2023. A recent campaign was unsuccessful in recruiting a consultant child and adolescent psychiatrist in CHO 2 and this will be re advertised. Recruited clinicians for these teams are currently delivering eating disorder care to people with eating disorders in their existing community teams and receiving training via the NCPED. It is expected that both of these teams will be operational in 2023.

The HSE continues to work closely with NDTP, National Doctors Training and Planning, to take measures to ensure trained clinicians in Eating Disorders are available to take up posts. Psychiatry training posts are available in all existing community eating disorder teams. The recruitment process has been impacted by the challenges in recruitment and retention experienced currently across the health service. Despite this all CHOs who have been allocated funding remain committed to recruiting staff and delivering community eating disorder teams. The NCPED works closely with all CHOs to support this recruitment.

Funding was secured in 2022 to support commencement of recruitment for Eating Disorder Posts in a 3rd phase of additional teams in CHO 9 (CAMHS), CHO 5 (adult) and CHO 1 (adult). In CHO 1 there are 2 dedicated eating posts (Clinical Nurse Specialist and psychotherapist) which were funded prior to the MOC and these experienced clinicians will be included in the new CHO 1 adult team. Consultant psychiatrists (2 x WTE 0.2) have been identified and this team will also be operational in 2023. Recruitment for teams in CHO 9 and CHO 5 is well underway. The interview for the adult consultant psychiatrist in CHO 5 was held in November however the successful candidate did not accept the post. This post will have to be re-advertised. The campaign for the consultant child & adolescent psychiatrist in CHO 9 closed on 27/10/2022 and interviews are due to take place in December.

The fourth phase of teams have been identified and relevant CHOs have submitted business cases including advance planning to support recruitment and identification of team premises. We are awaiting allocation of funding from 2023 budget. Once we have received confirmation of a budget allocation we will work with CHOs to progress the remaining teams.

NCPED recommendations to deliver 3 eating disorder teams per year to ensure sustainable phased recruitment and training. The HSE is provided funding on a yearly basis as per the estimates process.

I trust this information is of assistance to you. Please do not hesitate to contact me if you have any further queries.

Yours sincerely,
