14th March 2022

Deputy David Cullinane,
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

PQ 10677/22 – To ask the Minister for Health the number of patients that are waiting for longer than a year for a hearing aid; and if he will make a statement on the matter.

- David Cullinane

Dear Deputy,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question (PQ 10677/22) which you submitted to the Minister for Health for response.

The HSE is committed to delivering efficient high quality Audiology services to all eligible service users. In 2020, there were 36,701 Audiology patients seen by HSE community Audiology services.

COVID-19 has posed significant challenges for many service areas. In light of these unprecedented challenges together with the Government's guidance on social distancing and on 'Cocooning' for those aged over 70, the HSE has had to reassess its operation of Community Services nationally.

Children identified with a permanent childhood hearing aid loss are provided with hearing aids within two to four weeks of diagnosis. There are currently 2,979 adults waiting 52 weeks or more for hearing aid assessment or management.

I trust this information is of assistance to you.

Yours sincerely,

Seán McArt

General Manager Primary Care
National Community Operations
