16th February 2022

Deputy Ged Nash
Dáil Éireann
Leinster House
Dublin 2

Re PQ 5929/22 - To ask the Minister for Health the number of children aged 6 to 18 years of age who are residents in County Meath who were transferred to the HSE Children's Disability Network Team in County Louth in 2021, if additional resources have been allocated to the team in County Louth to cater for the needs of the additional children who are now catered for by the team and if he will make a statement on the matter – Ged Nash

Dear Deputy Nash,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response. I have examined the matter and outlined the position as follows.

Progressing Disability Services for Children and Young People Programme (PDS) is a significant change programme for the provision of therapeutic services for children from birth to 18 years of age. It is being rolled out nationally by the HSE in partnership with its funded voluntary organisations. PDS will

- Provide a clear pathway and fairer access to services for all children with a disability.
- Make the best use of available resources for the benefit of children and their families
- Ensure effective teams working in partnership with families and with education staff to support children with a disability to reach their full potential.

PDS requires pooling together all resources, including staff, facilities and equipment, from the different voluntary agencies and the HSE providing specialist children's disability services, in order to set up Children's Disability Network Teams (CDNTs). A CDNT comprises a team of health and social care professionals who will provide services for a specific geographical area, ie. Network.

Community Healthcare Networks:

All 91 CDNTs will align geographically with the 96 Community Healthcare Networks, enabling staff in both services to work better together, in order to ensure the best

outcomes for each child with a disability and their families using our services. Community Healthcare Networks are being implemented across the country to deliver this change and will reshape how we deliver community health care services. A Community Healthcare Network will deliver Primary Health Care Services across an average population of 50,000 and consist of 4-6 primary care teams including General Practice (GPs) working collaboratively to ensure better coordinated care for people using services.

Plan:

Re-configuration of services in Co. Louth and Co. Meath commenced on the 4th October 2021 and became operational from 27th October 2021.

Following an eight (8) week phased file transfer period from the 4th October 2021 to facilitate the transfer of files and accommodate a review of resources. The transfer of files from the Children's Disability Network Area 4, which encompass part of east Meath, to Children's Disability Network Area 3 (South Louth), occurred on 26th November 2021.

A National census review of all staffing in all networks is currently underway and a submission of request for additional development posts has been submitted to the National Office.

Transfer of 6-18 years from CDNT 2 & 6 (Kells & Trim) to CDNT 3 (South Louth):

- 163 children aged 6-18 years transferred from Children's Disability Network Team Area 2 & 6 (Kells & Trim) to the Children's Disability Network Team Area 3 (South Louth).
- Correspondence was sent to all families in advance of the transfer of services. This correspondence outlined the contact details of their CDNT and the appeals process.

I trust the above is in order but please do not hesitate to contact me should you have any further queries in this regard.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'Des O'Flynn', written over a horizontal line.

Des O'Flynn
