1st March 2022

Deputy Mark Ward,
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

PQ 8176/22 - To ask the Minister for Health the number of persons awaiting primary care psychology appointments, by gender in each CHO, in tabular form; and if he will make a statement on the matter.

- Mark Ward

Dear Deputy Ward,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question (PQ 8176/22) which you submitted to the Minister for Health for response.

The HSE is committed to delivering efficient high quality Psychology services to all eligible service users. In 2021, there were 45,120 patients seen by HSE Primary Care Psychology Services.

The spread of COVID-19 is posing significant challenges for many service areas. In light of these unprecedented challenges together with the Government's guidance on social distancing and on 'Cocooning' for those aged over 70, the HSE has had to reassess its operation of Community Therapy Services nationally, to ensure that the assessed needs of those clients with the highest priority are met.

Please note that there is no breakdown available by gender. The available breakdown is by age category, time waiting and CHO area. Please find attached Appendix 1 which contains, in tabular form, details of the waiting lists in Primary Care Psychology as of January 2022, which is the latest available data at this time. Please note where an individual LHO was unable to return the waiting list data for the month in question that is noted at the bottom of the waiting list table.

Appendix 1 – Number of Patients waiting for treatment January 2022

I trust this information is of assistance to you.

Yours sincerely,

Seán McArt
General Manager Primary Care
National Community Operations
