

22nd July, 2022.

Mr. Thomas Gould, TD.,
Dáil Éireann,
Dublin 2

PQ ref 39564/22

“To ask the Minister for Health the number of persons waiting for a speech and language appointment in each of the children's disability network teams in Cork; the number who have been waiting less than 3, 3- to 6, 6 to 12 and more than 12 months broken down in tabular form; and if he will make a statement on the matter.”

Dear Deputy Gould,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response.

It may be helpful if I provide some information on at the outset about the current service arrangements between the HSE and other independent providers. Progressing Disability Services for Children and Young People Programme (PDS) is a significant change programme for the provision of therapeutic services for children from birth to 18 years of age. PDS requires pooling together all resources, including staff, facilities and equipment, from the different voluntary agencies and the HSE providing specialist children's disability services, in order to set up Children's Disability Network Teams (CDNTs). A CDNT comprises of a team of health and social care professionals who will provide services for a specific geographical area aligning to the Community Healthcare Networks. All teams are in place since April 2021 and there are 14 CDNTs across Cork and Kerry.

A child's access to services is based on his/her needs, i.e. a diagnosis is not required. Instead of a service providing for children with one type of disability only, resulting in some children unable to access a service, each CDNT provides for all children with complex needs arising from their disability who live in that area. Children with non-complex needs receive services at Primary Care level.

Currently, the teams have large numbers of complex children on their caseloads who require an interdisciplinary team approach and this is provided on a needs basis due to priority and risk to child, young adult, and family in all environments such as home, school and in the community.

Disability Services does not gather data in the format that you have requested. However, please see below table which outlines the current caseload of children and young adults on each Childrens Disability Network Team:-

CDNT	Current Caseload
Northwest Cork Childrens Disability Network Team	650
Northeast Cork Childrens Disability Network Team	390
East Central Cork Childrens Disability Network Team	565
East Cork City Childrens Disability Network Team	621
Central Cork Childrens Disability Network Team	563
North Cork City & Blarney Childrens Disability Network Team	554
West Cork Childrens Disability Network Team	845
South East Cork City Childrens Disability Network Team	641
West Central Cork Childrens Disability Network Team	766
Carrigaline/Kinsale/Bandon Childrens Disability Network Team	780
South Cork City Childrens Disability Network Team	455

Cork Kerry Community Healthcare acknowledges the lengthy waiting times that children/young adults and their families are experiencing. We sincerely regret that any child/young adult has to wait for an assessment and both management and staff fully appreciate the level of stress that families are experiencing due to the current waiting times. Disability Services continues to engage with the Service Providers to ensure that where possible, some level of service is maintained, based on prioritising those with the greatest need.

If you require any further information please do not hesitate to contact my office.

Yours sincerely,

**Ms. Majella Daly,
Head of Disability Services,
Cork Kerry Community Healthcare**
