Re. **PQ 13125/22**: To ask the Minister for Health the number of women who were diagnosed with cervical cancer following gynaecology consultation in 2021 and to date in 2022.

Dear Deputy Clarke

The National Cancer Control Programme (NCCP) has been requested to reply directly to you in relation to the above PQ.

Data on the organisation and delivery of hospital-based consultations is the remit of each individual hospital. The NCCP do not have access to such data. General data on the number of cancers diagnosed each year are publicly available from the National Cancer Registry Ireland (www.ncri.ie).

The most recent annual report from the NCRI can be found at:

<https://www.ncri.ie/publications/statistical-reports/cancer-ireland-1994-2019-annual-report-national-cancer-registry>

Yours sincerely

Professor Risteárd Ó Laoide
National Director
National Cancer Control Programme
