6th April 2022

Deputy Sean Sherlock,
Dail Eireann,
Leinster House, Kildare Street,
Dublin 2.
E-mail: sean.sherlock@oireachtas.ie

Dear Deputy Sherlock,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary questions, which were submitted to this department for response.

PQ 15247/22

To ask the Minister for Health the number of children aged zero to 18 in each CHO by individual area and by each composite LHO within each CHO awaiting first-time intervention in all areas of early intervention; the number on the public list; the number on the children's disability network team list in each CHO in tabular form; and the length of time they are awaiting intervention by age.

PQ 15248/22

To ask the Minister for Health the number of individualised family service plans that have been issued and accepted by each individual children's disability network team by CHO area.

HSE Response

The HSE acknowledges the challenges in meeting the demand for children's disability services and is acutely conscious of how this impacts on children and their families. Children requiring interventions including health and therapy services, such as Speech and Language Therapy, Occupational Therapy, Physiotherapy, Psychology and other therapy services would access services through Primary Care Teams in CHO Areas as well as through Children's Disability Services.

While it is not possible to give information on the number of children aged zero to 18 awaiting first-time intervention in all areas of early intervention, Primary Care Operations has compiled the latest available waiting list data, on services for which they collate data, for the end of February 2021 for those aged 0 to 17 years and 11 months. Please see the tables provided in the appendix giving the Primary Care waiting lists for each LHO within each CHO.

- Table 1 in the Appendix includes the data for Psychology - Number of 0-17 years & 11 months old Patients waiting for treatment February.2022
- Table 2 in the Appendix includes the data for Occupational Therapy - Number of 0-17 years & 11 months old Patients Awaiting First Time Assessment February.2022.
- Table 3 in the Appendix includes the data for Physiotherapy - Number of 0-17 years & 11 months old Patients waiting for Assessment February.2022.
- Table 4 in the Appendix includes the data Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Assessment - February.2022
- Table 5 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Therapy - February.2022.

- Table 6 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Further Therapy - February.2022
- Table 7 in the Appendix includes the data for Dietetics - Number of 0-17 years & 11 months old patients waiting for treatment February.2022
- Table 8 in the Appendix includes the data for Ophthalmology - Number of 0-17 years & 11 months old Patients waiting for treatment February.2022
- Table 9 in the Appendix includes the data for Audiology - Number of 0-17 years & 11 months old Patients waiting for treatment February.2022

Children's Disability Network Teams (CDNTs)

Ninety-one Children's Disability Network Teams (CDNTs) have been established to provide services and supports for all children with complex needs within a defined geographic area. CDNTs are teams of health and social care professionals, including nursing, occupational therapy, psychology, physiotherapy, speech and language therapy, social work and others. The team will work closely together in a family centred model, focusing on the child's and family's own priorities. Every child with complex needs will have access to a team, regardless of the nature of their disability, where they live, or the school they attend.

Children and their families will have access to the full range of services and supports of the CDNT according to their individual needs. This includes universal, targeted and specialist supports, such as individual therapeutic intervention and access to specialist consultation and assessment when needed. Supports will be provided as is feasible in the child's natural environments - their home, school and community.

Commencement of services in all ninety-one CDNTs in 2021 marked the end of Phase 1 of the reconfiguration of children's disability services. In parallel, phase 2, the development of the interdisciplinary family centred practice model is now in train. The HSE acknowledges that this change programme has been challenging for some stakeholders. This programme, in particular the development of family centred practice, involves a mind-set change for all stakeholders, including health professionals, families and referrers regarding how services will be delivered (though what is delivered will continue).

Health and social care professionals have traditionally been trained at undergraduate and postgraduate level to provide 'care and treatment' for children and their families, typically in 'blocks of therapy' and this is what parents and referrers have come to expect. However, all children develop and learn by taking part in daily life and activities with their family, in their home, in pre-school, in school and their community. The child's family and those who are with them every day are therefore the most important people in their lives.

Internationally recognised best-practice indicates the value of changing from providing disability services 'to' or 'for' children, towards supporting families in their role. Services are moving from being professionally-centred, or expert-led, to being family-centred and family-facilitated. When services are family-centred the team of professionals and the family work as equal partners. The family brings knowledge of their child and the team brings their expertise. Together they agree on and co-design goals and how they will be achieved.

National Information Management System for the CDNTs (CDNTIMS)

Historically the number of children waitlisted for children's disability services provided by section 38 and section 39 providers has not been available nationally. The number of open cases with an individual family service plan is not collated nationally. The establishment of CDNTs will facilitate the collection of this data. A National Management Information System for all 91 CDNTs is in development and when implemented, will provide current data on waiting lists and other details for all CDNTs. In the interim, manual data collection is on-going and will provide information to the local areas regarding the number of children waiting for each CDNT.

Yours sincerely

Bernard O'Regan
Head of Operations - Disability Services,
Community Operations
