As with other areas disability services within South East Community Healthcare (SECH) are experiencing significant recruitment challenges. SECH continues to express posts out to current national panels and continues to prioritise local recruitment campaigns. We are acutely aware of the high demand for services in our CHO and the impact of delays in accessing services on children and families. In the interim, the Children's Disability Network Managers (CDNM) are exploring different ways to offer support to children and families currently waiting to access services. This includes developing webinars, group based workshops, information sessions and the development of a repository of resources for children and their families to promote and enable wellbeing at home.

From a national perspective significant challenges are being experienced in relation to the on-going recruitment of allied health professionals. Within South East Community Healthcare there is a continued focus on the recruitment across all therapy grades.

I trust this information is of assistance to you. Should you have any further queries please do not hesitate to contact me.

Yours sincerely,

Ms. Kate Killeen White
Chief Officer
