**25 October 2022**

**Deputy David Cullinane  
Dáil Eireann  
Leinster House  
Kildare Street  
Dublin 2**

**PQ 50408/22: To ask the Minister for Health the number of adults and children who are on public dental and orthodontic waiting lists for each month of the years 2017 to 2021 and to date in 2022, by county, region and CHO in tabular form.**

Dear Deputy Cullinane,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for response.

#### **HSE Dental Service**

HSE Dental Services are provided through 17 Dental Areas, all of which continue to provide routine services. The dental service prioritises treatment for people with special care needs, those who are medically compromised and provides emergency care for all eligible patients.

These services are delivered with a strong preventive ethos in order to minimise the incidence of dental disease in vulnerable populations. In particular this preventive approach involves the delivery of personalised oral health promotion for children and people with special care needs. Children are seen at ages that correspond with dental developmental milestones to identify opportunities for timely preventive interventions such as fissure sealants and the need for restorative treatment, as well as monitoring the eruption of the permanent dentition including possible orthodontic anomalies requiring referral for HSE orthodontic assessment.

Since the emergence of Covid-19, there has been a significant increase in delays in accessing routine treatment for those in target classes. This has resulted in backlogs emerging in the targeted schools programme. The scale of disruption to services nationally in 2020 meant that attendance for dental examinations by children was reduced to 36.5% of 2019 activity, while in 2021 the comparable attendance was 54.5% of 2019 activity.

Throughout the course of the Covid-19 pandemic, including in 2022, the HSE responded to a number of emerging problems, including testing capacity, contact tracing and the implementation of updated infection prevention and control guidance. Each of these has involved the HSE Dental Service, with extensive redeployment for testing and contact tracing, as well as for the mass vaccination programme. In some locations, access to clinical facilities was reduced due to repurposing for pandemic-related activities. The cyberattack on the HSE system in summer 2021 also had significant impacts on Dental Services.

While most oral health staff have now returned to core duties enabling the safe resumption of services, Covid-19 continues to impact on service provision for patients and staff.

As part of targeting of resources, each dental service maintains a commitment to urgent/emergency treatment for the relief of pain, infection, and the sequelae of trauma. All children in targeted classes are offered dental examination, with individual care plans based on each child's needs. For routine and preventive services, patient groups are prioritised with children and adults with special care needs given the highest priority, followed by children in 6th class. Where service deficits are identified locally, clinical teams can be redirected to address those needs.

The extent of the backlog in targeted services and delays in providing preventive interventions and treatment for patients are concerns for the HSE, with services working to reduce the backlog in treatment appointments. Delays in assessments may reduce opportunities for preventive measures as disease is not identified early. Levels of scheduled examinations improved to 65% in early 2022, but significant backlogs in treatment remain.

I wish to advise that the system does not hold data in the manner requested. Appendix 1 details KPI data for the Dental Service (2017-2021 and to date in 2022). The reported metric is the number of new oral health patients in target groups attending for scheduled assessment.

### **HSE Orthodontic Service**

Orthodontic treatment waiting lists are collated and reported according to HSE eligibility criteria Modified IOTN, Grade 4 or Grade 5.

The HSE Orthodontic Service is provided in Regional Orthodontic Departments. Access to treatment with the HSE Orthodontic Service is limited to those children with the most severe and complex orthodontic treatment needs. Referral for orthodontic assessment is usually made in 6th Class. The Modified Index of Treatment Needs (Modified IOTN) system is used in all regions to determine if a child will be accepted for treatment. There are a number of categories within the Modified IOTN system, and these are used to prioritise care, children whose treatment need is assessed as being in Grade 4 or Grade 5 of the Index are offered treatment with the HSE.

I wish to advise that the system does not hold data in the manner requested. Appendix 2 details KPI data for the Orthodontic Service (2017-2021 and to date in 2022).

I trust this information is of assistance to you, but if you require further clarification please do not hesitate to contact me.

Yours Sincerely,

---

**Joseph Green**
