9th September 2022

Deputy Sean Sherlock,
Dail Eireann,
Leinster House,
Kildare Street,
Dublin 2.
E-mail: sean.sherlock@oireachtas.ie

Dear Deputy Sherlock,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

PQ: 42393/22

To ask the Minister for Health the number of children aged 0 to 18 years who are waiting for first-time intervention in all areas of early intervention in each CHO, by individual area and by each composite LHO within each CHO; the number on the public list; the number on the children's disability network team list in each CHO in tabular form; and the length of time that they have been waiting for intervention by age.

HSE Response

The HSE acknowledges the challenges in meeting the demand for children's disability services and is acutely conscious of how this impacts on children and their families.

Children requiring interventions including health and therapy services would access services through Primary Care Teams in CHO Areas as well as through Children's Disability Services.

HSE Disability Services does not gather data on services provided through other service areas such as Primary Care. It is not possible to give information on the number of children aged zero to 18 awaiting first-time intervention in all areas of early intervention, however Primary Care Operations has compiled the latest available waiting list data, on services for which they collate data, for the end of June 2022 for those aged 0 to 17 years and 11 months.

- Table 1 in the Appendix includes the data for Psychology - Number of 0-17 years & 11 months old Patients waiting for treatment June 2022.
- Table 2 in the Appendix includes the data for Occupational Therapy - Number of 0-17 years & 11 months old Patients Awaiting First Time Assessment June 2022.
- Table 3 in the Appendix includes the data for Physiotherapy - Number of 0-17 years & 11 months old Patients waiting for Assessment June 2022.
- Table 4 in the Appendix includes the data Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Assessment - June 2022.
- Table 5 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Initial Therapy - June 2022.
- Table 6 in the Appendix includes the data for Speech and Language Therapy - Number of 0-17 years & 11 months old patients awaiting Further Therapy - June 2022
- Table 7 in the Appendix includes the data for Dietetics - Number of 0-17 years & 11 months old patients waiting for treatment June 2022.

- Table 8 in the Appendix includes the data for Ophthalmology - Number of 0-17 years & 11 months old Patients waiting for treatment June 2022
- Table 9 in the Appendix includes the data for Audiology - Number of 0-17 years & 11 months old Patients waiting for treatment June 2022

Children's Disability Network Teams (CDNTs):

In line with the Progressing Disability Services model, resources assigned to children's disability services are allocated to the 0 – 18 Children's Disability Network Teams (CDNTs) rather than to a dedicated early intervention team or dedicated school age team.

All 91 Children's Disability Network Teams are now in place. These teams provide services and supports for all children with complex needs within a defined geographic area.

CDNTs are teams of health and social care professionals (e.g., occupational therapists, psychologists, physiotherapists, speech and language therapists, social workers) and others disciplines (e.g., nursing). The reconfiguration into CDNTs and the resultant staffing mix was influenced by a number of factors including the staff resources of existing services and the available skill mix. Hence, some CDNTs may include disciplines such as nurses, family support workers or early educators.

Regardless of the nature of their disability, where they live, or the school they attend, every child with complex needs and their families have access to the full range of family centred services and supports of their CDNT according to their individual needs. This includes universal, targeted and specialist supports, such as individual therapeutic intervention and access to specialist consultation and assessment when needed. Supports are provided as is feasible in the child's natural environments - their home, school and community.

Work is ongoing on mapping specialised services and supports, and paediatric supports available and gap analysis for children with highly complex needs, in order to develop standardised approaches to integrated pathways of support for CDNTs and Primary Care staff.

National Information Management System for the CDNTs (CDNTIMS)

Historically the number of children waitlisted for children's disability services provided by section 38 and section 39 providers has not been available nationally. The establishment of CDNTs will facilitate the collection of this data.

A National Management Information System for all 91 CDNTs is in development and when implemented, will provide current data on waiting lists for all CDNTs. In the interim, manual data collection is on-going and will provide information to the local areas regarding the number of children waiting for each CDNT.

Yours sincerely,

Bernard O'Regan
Head of Operations - Disability Services,
Community Operations
