

Matt Shanahan, T.D.
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

13th September 2022

PQ: 42665/22

To ask the Minister for Health if he will ringfence some of the anticipated 2021 cost savings from the recent HSE Medicines Management Programme (MMP) Preferred Blood Glucose Strips for adults with Type 1 and Type 2 diabetes evaluation to fund the provision of the Freestyle Libre Flash Glucose Monitoring System to persons with diabetes over 21 years of age based on clinical need; and if he will make a statement on the matter. -Matt Shanahan

Dear Deputy Shanahan,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question (Reference 42665/22), which you submitted to the Minister for Health for response.

In February 2021, the HSE Medicines Management Programme (MMP) identified preferred blood glucose test strips (BGTS) with associated meters for adults with type 1 and type 2 diabetes mellitus to deliver cost savings in this area. This initiative was supported by the Diabetes Programme. Whilst it was hoped that some of this funding would be available towards the FreeStyle Libre technology, any savings created by the preferred BGTS have been offset by deficits in the system.

Consultant Endocrinologists / Diabetes Nurse Specialists may apply to the HSE, on behalf of specific patients, for reimbursement support of FreeStyle Libre Flash Glucose Monitoring (FGM) sensors. This includes those persons with eligibility under Community Drug Schemes (e.g. medical card holders, those with Long Term Illness eligibility). The application process is undertaken by means of a dedicated online portal, which has been operational since 3rd April 2018. In line with the recommendations outlined of the Health Technology Assessment Group, access to this product was made available to children and young adults (4 -21 years). However, the application process does cater for the Consultant to make an application in very exceptional circumstances for a type 1 diabetic patient outside of this group.

Yours sincerely,
