Dear Deputy O'Sullivan,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response. I have examined the matter and the following outlines the position.

Response:

The process is that models of care are developed and approved, they then require a funding stream to support implementation. Not all models of care and/or guidelines are necessarily published on the HSE website but are available for circulation and as a reference to support service development when required by hospital groups.

The process has commenced in seeking funding to support implementation.

I trust this answers your question to your satisfaction.

Yours sincerely,
