16th May 2023

Deputy David Cullinane,
Dail Eireann,
Leinster House,
Kildare Street,
Dublin 2.
E-mail: david.cullinane@oireachtas.ie

Dear Deputy Cullinane,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

PQ: 208895/23

To ask the Minister for Children; Equality; Disability; Integration and Youth the number of children on disability service waiting lists for children's disability networks teams, by CHO/CDNT at the end of quarter 1 2019-2023, inclusive, in tabular form; the average length of wait; and if he will make a statement on the matter.

HSE Response

Children's Disability services in Ireland are currently undergoing a major reform process. During 2021, reconfiguration of children's disability services, under the Progressing Disability Services model, took place with the establishment of ninety-one Children's Disability Network Teams (CDNTs) to provide services for at least 42,000 children with complex needs in the State. The establishment of CDNTs is intended to facilitate the provision of equitable, child and family centred services for all children with complex needs associated with their disability or developmental delay.

These 91 Children's Disability Network Teams (CDNTs) are aligned to 96 Community Healthcare Networks (CHNs) across the country and are providing services and supports for children aged from birth to 18 years of age.

CDNTs are teams of health and social care professionals, including nursing, occupational therapy, psychology, physiotherapy, speech and language therapy, social work and others. The team works closely together in a family centred model, focusing on the child's and family's own priorities.

Regardless of the nature of their disability, where they live, or the school they attend, every child with complex needs and their families have access to the full range of family centred services and supports of their CDNT according to their individual needs. This includes universal, targeted and specialist supports, such as individual therapeutic intervention and access to specialist consultation and assessment when needed. Supports are provided as is feasible in the child's natural environments - their home, school and community.

Since 2019, more than 610 development posts have been allocated to children’s disability services across the country. These posts have been assigned to teams based on a number of factors, including the existing ratio of staff to the number of children with disabilities in each area. This figure includes 190 posts provided in 2022 as well as an additional 136.3 WTEs to restore pre-existing services in 104 special schools.

The HSE continues to explore a range of options to enhance the retention and recruitment of essential staff across all aspects of the health services. The HSE is operating in a very competitive global market for healthcare talent as there are significant shortages of qualified healthcare professionals across the globe. The HSE Community Operations Disability Services is working collaboratively with the CDNT lead agencies at CHO level to promote CDNTs as a workplace of choice in a competitive employment market. Each lead agency is responsible for recruitment of staff on their CDNTs and is using a variety of approaches to fill funded vacancies.

National Information Management System for the CDNTs (CDNTIMS)

Historically the number of children waitlisted for children’s disability services provided by section 38 and section 39 providers has not been available nationally.

The establishment of CDNTs will facilitate the collection of this data. A National Management Information System for all 91 CDNTs is being rolled out and when implemented, will provide current data on waiting lists and other details for all CDNTs. In the interim, manual data collection is on-going and will provide information to the local areas regarding the number of children waiting for each CDNT.

The most recent data available is provided in the table below and shows the number of children that are waiting for an initial contact with a CDNT in the 9 CHO Areas. This Dataset represents end of March 2023 activity reports. Please note that CHO 8 data is end of December 2022*.

Information is not collated on the average time on waiting lists.

Status report	CHO 1	CHO 2	CHO 3	CHO 4	CHO 5	CHO 6	CHO 7	CHO 8	CHO 9
No of children waiting 0-3 months for an initial contact @month end	402	170	335	150	157	84	133	361*	71
No of children waiting 4-6 months for an initial contact @month end	310	133	224	154	121	112	207	498*	84
No of children waiting 6-12 months for an initial contact @month end	299	202	269	230	282	281	521	367*	304
No of children waiting over 12 months for an initial contact @month end	375	442	377	1303	1399	740	1729	1903*	2428

Please also note that this is an interim dataset as we await the roll out of the National Information Management System and some individual CDNTs indicate that they do not have a system in place to capture this level of activity, therefore there are gaps in data returns for some of the CHO Areas.

Yours Sincerely,

**Mr Bernard O'Regan,
Head of Operations - Disability Services,
Community Operations**
