### Office of the Assistant National Director,

National Disability Team, First Floor- Offices 13, 14, 15, Roselawn House, University Business Complex, National Technology Park, Castletroy, Limerick.

9<sup>th</sup> April 2024

Deputy Jim O'Callaghan Dail Eireann, Leinster House, Kildare Street, Dublin 2. E-mail: jim.ocallaghan@oireachtas.ie

Dear Deputy O'Callaghan,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

## PQ: 14459/24

To ask the Minister for Health the number of new emergency places provided to people with a disability as of 1 April 2024; and if he would provide a breakdown by each LHO area of same, in tabular form.

#### **HSE Response**

#### **Emergency Residential Placements**

In previous years, funding has been allocated in the National Service Plan to provide for additional new emergency residential placements, as follows:

- The HSE responded to 474 "emergency places/cases" between 2014 and 2016.
- NSP 2017 made provision for 185 new emergency residential placements
- Between 2018 and 2020, the HSE developed a total of 252 new emergency places across the 9 CHOs.
- In accordance with the NSP 2021, 91 new emergency residential places were developed; a further 25 planned residential places also opened in 2021; 4 adult transfers to Tusla also took place. A further 19 people aged under 65 living in nursing homes were supported to move to homes of their choosing in the community, during the year.

- In accordance with the NSP 2022, the HSE developed 103 new emergency residential places together with 11 Planned Residential places and 18 new intensive support packages and 19 new supported living packages. The CHO Areas indicated that 22 people transitioned from Nursing Homes to homes of their choosing in the community and 32 packages to support adults ageing out of Tusla services were put in place.
- In accordance with the NSP 2023, the HSE has been allocated funding to provide 43 additional residential places in response to current need. In addition, in line with the Winter Plan, 27 people received new residential places with 3 further receiving home care packages. A further 25 residential care packages were developed for young people ageing out of Tusla services in line with the Joint Protocol.

Please see the table below. This is the most recent information available.

At end of 2023, 160 Priority 1 (Emergency) Residential Places were developed. This is significantly in excess of the NSP target of 43 places based on funding allocation and reflects the increased demand for residential services throughout the country and the need to respond to changing/ unmet service user need (Including clinical/ safeguarding risks).

СНО	Priority 1 (Emergency) Residential Places 2023
CHO 1	7
CHO 2	15
CHO 3	21
CHO 4	19
CHO 5	14
CHO 6	9
CHO 7	26
CHO 8	32
CHO 9	17
Total	160

Please note, in addition, 45 new in home respite supports for emergency cases were delivered, against the NSP target of 27 places based on allocated funding.

## Future Planning

The demand for full-time residential placements within designated centres is extremely high and is reflective of the absence of multi-year development funding that has not been in place since 2007/2008.

The Department of Health's 2021 Disability Capacity Review has projected a need for a minimum of an additional 1,900 residential places by 2032 under a minimum projection and an extra 3,900 in order to return to levels of provision prior to the beginning of the 2008 recession.

The cost of procuring Emergency Placements, has increased significantly over the last few years. The average cost of a new residential placement has increased from €284k in 2019 to €332k per place in 2022 and 63% of placements in 2022 were through for-profit providers.

## Action Plan for Disability Services 2023-2026

The Action Plan for Disability Services 2024-2026, sets out a three year programme designed to tackle the deficits highlighted in the *Disability Capacity Review to 2032*, which identified the demand for specialist community-based disability services arising from demographic change, and considerable levels of unmet need.

Specifically, the Disability Capacity Review projected a need for a minimum of an additional 1,900 residential places by 2032 under a minimum projection and an extra 3,900 in order to return to levels of provision prior to the beginning of the 2008 recession. Moreover, the central projection of the Capacity Review suggests that adults with intellectual disabilities requiring specialist services will increase by a sixth between 2018 and 2032, with fastest growth for young adults (up a third by 2032) and over 55s (up a quarter). These projections include an average of approximately 90 new residential places that will be needed each year from 2020 to 2032 to accommodate changes in the size and age structure of the disability population.

The Action Plan is designed to provide additional funding for developments that will help build capacity within services, so that the benefits of these funding increases will be felt directly by the service user. This will also help the HSE in dealing with some of the key cost-drivers in service delivery, such as high-cost emergency residential placements, giving greater flexibility and control when planning services.

Yours sincerely,

Bernard O'Regan

Bernard O'Regan Assistant National Director, Disability Services Team
