10th September 2024

Deputy Pauline Tully,
Dail Eireann,
Leinster House,
Kildare Street,
Dublin 2.
E-mail: pauline.tully@oireachtas.ie

Dear Deputy Tully,

The Health Service Executive has been requested to reply directly to you in the context of the following parliamentary question, which was submitted to this department for response.

PQ: 34032/24

To ask the Minister for Children; Equality; Disability; Integration and Youth further to Parliamentary Question No. 31 of 18 June 2024, if the CDNT staff census for 2023 has been published; and if so, if he will provide this Deputy with a copy of same.

HSE Response

The attached CDNT Staff Census and Workforce Review 2023 gives a picture of the staff working in our children's disability teams on October 11th 2023. An industrial relations process impacted the return of data captured in October 2023 and delayed publication of the report.

The 2023 census and workforce review shows,

- Total number of filled whole time posts - 1,437 up 3% on last year
- Total number of filled therapy posts - 1,179
- Total number of vacancies nationally at 11/10/23 - 817.23

Year	Total approved whole time posts	% Increase year on year	Total filled whole time posts	% Increase year on year	No of therapy posts
2023	2,255	7%	1,437	3%	1179
2022	2,102	10%	1,395	2%	1183
2021	1,892		1,367		1173

Childrens Disability Services

In line with the Progressing Disability Services model, resources assigned to children's disability services are allocated to the 0 – 18 Children's Disability Network Teams (CDNTs). 93 CDNTs are aligned to 96 Community Healthcare Networks (CHNs) across the country and are providing services and supports for children aged from birth to 18 years of age.

The CDNTs are currently providing services and supports for over 46,000 children and strategies and supports for urgent cases on the waitlist where staffing resources allow. However, there are significant challenges for CDNTs including:

- Significant staffing vacancies
- Growth in numbers of children with complex need
- Growth in demand for Assessment of Need, diverting further resources away from interventions

Roadmap for Service Improvement 2023 – 2026, Disability Services for Children and Young People

The HSE's Roadmap for Service Improvement 2023 – 2026, Disability Services for Children and Young People is a targeted Service Improvement Programme to achieve a quality, accessible, equitable and timely service for all children with complex needs as a result of a disability and their families.

The Roadmap, now in its implementation phase, has established four Working Groups which report into a Service Improvement Programme Board every month which in turn reports to the Roadmap Oversight Group chaired by the Minister of State, Ann Rabbitte.

Working Group 3: Workforce – has responsibility for developing a recruitment strategy for all CDNTs regardless of the Lead Agency; Retention of existing CDNT staff; Deployment of Students/Trainees/New Graduates; and Development of Existing Staff.

The Roadmap outlines the following Workforce Summary Requirements.

- 462 of the 700 CDNT vacancies to be filled by Q4 2024
- 240 balance of CDNT vacancies to be filled in 2025
- 360 WTE new CDNT posts 2025-2026
- 300 Therapy Assistant posts over 2023 (50), 2024 (125) and 2025 (125)
- 78 WTE paediatric posts to Primary Care CHNs - 2024
- 6 WTE CHO Service Improvement Leads - 2024

The *Action Plan for Disability Services 2024 – 2026*, states that around 600 extra WTE (mix of therapy and assistant grades) for Children's Disability Network Teams 2024-2026, are required to address vacant posts, build capacity, deliver timely access to early intervention and multidisciplinary supports, and ensure continuity of services.

The *Disability Capacity Review to 2032-A Review of Disability Social Care Demand and Capacity Requirements up to 2032*, states that demographic demand for children's therapy services, at current use rates, will be broadly stable up to 2027, as fewer young children will be largely counterbalanced by larger numbers of teenagers. By 2032, however, the total number of children will fall, lowering demand for children's therapy services by about 10%.

In addition, the HSE plans to commence a further workforce planning process in October 2024 for all Disability Services including CDNTs.

Retention and recruitment

The HSE and disability providers continue to focus on staff retention and recruitment. There is an acknowledged national and international shortage of health and social care professionals with the necessary qualifications and experience. Seven of the disciplines working in children's disability teams have been included on the Department of Enterprise, Trade and Employment's Critical Skills Occupations List*. Despite this challenge the HSE and partner disability

organisations have increased the capacity of CDNTs by 3%. There has been further net growth across the Disability services in 2024.

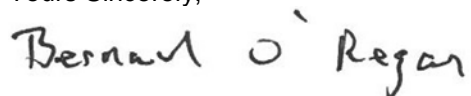

Jobs are being actively offered to candidates. To support interest in these roles, staff from the CDNTs delivered a series of webinars in July, to help prospective employees learn about the roles we're offering, inter-disciplinary team working and the children and families we support. There was large attendance from Ireland and abroad.

The HSE Careers Hub is highlighting working in Children's Disability Network Teams. The HSE is actively engaging with undergraduates through the Higher Education Institutes, spotlighting disability roles in career and recruitment fairs and generating future interest in working in the disability services with outreach into secondary schools.

The number of clinical placements in CDNTs has been increased and will continue to grow to encourage health and social care undergraduates to choose a job in children's disability services post- graduation.

The HSE with the partner voluntary agencies are developing new disciplines to optimise workforce potential with access to these roles pitched at lower entry level and opportunities to pursue further education in an apprenticeship model.

Yours Sincerely,

Bernard O'Regan
Assistant National Director
National Disability Team
