Re: PQ ref 8452/25

“To ask the Minister for Health the number and name of hospitals where the health performance visibility platform systems has yet to go live.”

Dear Deputy Sherlock,

To ask the Minister for Health the number and name of hospitals where the health performance visibility platform systems has yet to go live”

Data is being loaded from all 28 hospitals intended for Phase 1 roll out of the Health Performance Visualisation Platform system. This data load process relies on complex technical integration from a range of different data sources across these hospitals and then subsequent reviewing of this data from a quality perspective. There are 2 hospitals in the final stages of this the technical implementation process and are expected to go live in the coming weeks.

The Health Performance Visualisation Platform is currently live in 26 of the 28 acute hospital sites which are in the initial scope of the programme.

Of the 2 sites remaining to go live, Beaumont Hospital and Mater Hospital are both in the final stages of implementation and are due to go live in the coming weeks.

If you feel that the question has not been fully answered or you require any further clarity, please contact me.

Yours sincerely,

Fran Thompson,
Chief Information Officer, Technology and Transformation, HSE.
