PQ: 42644/25

To ask the Minister for Children; Disability and Equality the number of children on a waiting list for initial contact from a CDNT, by health region and integrated healthcare area; age category; and time waiting, in tabular form.

Dear Deputy Rice,

Thank you for your Parliamentary Questions referenced above, which have been forwarded to me for direct reply.

In line with the Progressing Disability Services model, all 93 CDNTs, aligned to 96 Community Healthcare Networks (CHNs) across the country, are in place and are providing services and supports for children aged from birth to 18 years of age.

Each CDNT covers a specific geographical area and holds a waiting list for children with complex needs residing in that area.

The model of service for all CDNTs is family-centred and based on the needs of the child. This includes universal, targeted and specialised supports and interventions, as appropriate to the individual child and family. It is based on the objectives of empowering and supporting parents and others who are with the child on a daily basis to facilitate the child's developmental needs.

The CDNTs are currently providing services and supports for 44,000 children and strategies and supports for urgent cases on the waitlist where staffing resources allow.

Roadmap for Service Improvement 2023 – 2026, Disability Services for Children and Young People

The HSE's Roadmap for Service Improvement 2023 – 2026, Disability Services for Children and Young People is a targeted Service Improvement Programme to achieve a quality, accessible, equitable and timely service for all children with complex needs as a result of a disability and their families.

The Roadmap, has four Working Groups which report into a Service Improvement Programme Board every month, which in turn reports to the Roadmap Oversight Group which was chaired by the Minister of State.

Working Group 2: Service Access and Improvement – has responsibility for Waitlist Management and Services; Optimising Teams Efficiencies, Effectiveness and Governance; AONs overdue for completion; and the development of a National Capital plan to enable all staff of a CDNT to be co-located.

Waiting List for the Childrens Disability Services

Historically the number of children waitlisted for children's disability services provided by section 38 and section 39 providers has not been available nationally. The establishment of CDNTs in 2021 has facilitated the collection of this data. A National Information Management System for all 93 CDNTs is being rolled out and when implemented, will provide current data on waiting lists and other details for all CDNTs.

Pending full roll-out to all 93 CDNTs, manual data collection is currently in place nationally as an interim measure.

The table below is the validated data for the end of June 2025 activity reports. This shows the number of children that are waiting for an initial contact with a CDNT in the 6 Regional Healthcare Areas (RHAs). We are unable to provide average wait times and age profile of those children on waiting lists as this data is not collated nationally.
