2nd April 2025

Deputy David Cullinane TD,
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

Re PQ 10914 25: *To ask the Minister for Health the spend by the HSE on agency staffing and on private recruitment firms for each year from 2019 to 2024, and to date in 2025, in tabular form; the amount paid to each individual firm; and the time period for payments to each firm.*

Re PQ 10915 25: *To ask the Minister for Health the spend by each of the section 39 38 voluntary hospitals on agency staffing and on private recruitment firms for each year from 2019 to 2024, and to date in 2025, in tabular form; the amount paid to each individual firm; and the time period for payments to each firm.*

Dear Deputy Cullinane,

The Health Service Executive has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for Health for response. Your PQs above have been referred to me for response.

Context

The available supply in the labour market for health workforce continues to be a challenge. This is not unique to Ireland, but rather a global health workforce challenge. Recruitment and retention of Clinical, Nursing and other key staff is a constant challenge and impacts adversely on the ability to maintain safe and effective services. Therefore, as part of the HSE's overarching resourcing approach whereby direct employment does not meet the needs of service delivery requirements, agency staff are utilised. This can be for a variety of reasons, including sick absence replacement, both long and short term, to replace vacancies currently being actively recruited to, to replace maternity leave etc. There are also additional resourcing requirements with the replacement of lost hours in critical services areas following the reversal of the Haddington Road Agreement.

In advance of the filling of these hours via direct employees, there is a need to prioritise critical services for replacement through agency and overtime. Collectively, these give rise to the utilisation of agency resources however while simultaneously running large scale domestic and international recruitment campaigns to fill through direct employment. At times the HSE have been unable to fill a vacancy even via agency. The agencies have indicated that they are experiencing difficulty in recruiting themselves due to a lack of availability and also accommodation availability and costs.

While operating within spend limits, the HSE Senior Leadership Team have committed to fully deliver on the planned activity levels as set out in the HSE National Service Plan including the Waiting List Action Plan and Urgent and Emergency Care Plan. This requires the dual approach of improving the productivity of key services and managing the level and affordability of our

workforce through the application of both the HSE's Pay and Non-Pay control limits. This is particularly focused around staffing levels, including getting to levels of agency and overtime which is sustainable into 2025.

The HSE is focussed on maximum delivery of the savings agreed to as part of the two-year funding agreement set out in the National Service Plan for 2025 i.e. new for 2025 and any undelivered in 2024. As part of the overall financial stabilisation of the HSE, significant progress has been made on pay in terms of planning, allocation and control and the new control environment ensures there is absolute clarity on staffing parameters whilst embedding a culture of continuous improvement in productivity. There remains work still to do to achieve the level of agency and overtime savings required and fundamentally hospitals will be more challenged in terms of living within overall pay allocation including direct pay. The focus on 2025 will be reducing this challenge.

Please see **Appendix 1** (separate excel file attached) which shows the total HSE expenditure on agency staff for the years 2019 to 2024 and for the month of January 2025 which is the most recent data available. The breakdown provided is by the Department of Health staff categories i.e. Medical/Dental, Nursing, Management/Admin, Paramedical, Support Services and Maintenance/Technical staff. The data provided was sourced from the HSE Consolidated Financial Intelligence system and is for HSE Statutory services only. Please note that the figures for 2024 are draft only and are subject to change within the year end audit process and 2025 figures are draft only.

The majority of agency spend is salary and statutory pay costs such as PRSI, holiday allowance etc. In line with the Protection of Employees (Part-Time Work) Act agency staff have the right to the same basic employment conditions, this includes basic pay, shift premiums, unsocial hours and Sunday rates.

In relation to your request for *“on agency staffing; and the amount paid to each individual firm and the time period for payments to each firm”* I regret to inform you that the data requested is not readily available from the HSE finance ledgers. The information you have requested is not centrally collated nor separately identifiable from the HSE finance ledgers and would need to be manually extracted by regional finance staff. To extract these records would require an extensive exercise by regional finance staff from the numerous HSE financial ledger systems in operation throughout the country and the manual collation of the information.

However, information on payments for agency staffing by vendor is available for the years 2019 to 2021 from data previously collated though an extensive manual exercise. Please see attached **Appendix 2** (separate excel file attached) to this response. [Appendix 1 represents expenditure in the year (it includes accruals and prepayments). Appendix 2 represents payments made to these vendors in the calendar years 2019 to 2021 (it does not include accruals and prepayments). This is the reason the totals for the yrs. 2019 to 2021 are different in Appendix 1 & Appendix 2.]

In relation to your request for *“on private recruitment firms for each year, 2019-2024, in tabular form; and the amount paid to each individual firm and the time period for payments to each firm”* I regret to inform you that the particular information you have requested is not centrally collated nor separately identifiable from the HSE finance ledgers. The data requested is not readily available from the HSE finance ledgers or from previously collated data and would need to be manually extracted by regional finance staff. To extract these records would require an extensive exercise in order to separately identify recruitment costs, including the manual extraction of relevant data by regional finance staff from the numerous HSE financial ledger systems in operation throughout the country and the manual collation of the information.

However, we do have some information readily available, collated previously through a resource intensive exercise, which shows payments to recruitment firms by vendor for recruitment costs for the years 2020, 2021 and 2022. Please see **Appendix 3** (separate excel file attached). This is the best information available at this time. The data was sourced from HSE regional finance ledger systems and is for HSE Statutory services only. Please note that it excludes information for the South region as due to systems and resource limitations they were unable to extract the data.

With numerous ledger systems in operation in the HSE for these time periods, some differences in coding may have arisen. The costs will include for example recruitment advertising costs, placement fees, recruitment expenses and likely includes some agency pay in some cases. It is not possible to quantify the extent of such coding issues as this would require an extensive analysis of individual invoices for which the resources are not available. It is for this reason that HSE South was unable to provide the data requested.

The shortcomings in the HSE legacy financial systems are well acknowledged and their replacement by a single integrated financial management system for the Health Sector is at the core of the Finance Reform programme initiated by the Department of Health.

In relation to your request PQ 10915 25 please note you will need to submit this request to the Section 38 organisations directly as publicly funded Section 38 organisations are separate entities for these purposes. The HSE does not hold governance over Section 38 organisations' management information. Section 38 organisations are independent legal entities with their own Boards/Councils. Within the Section 38 Service Arrangements regarding Roles and Responsibilities, under the Duties of the HSE, at Clause 3.1b (ii) the HSE contractually recognise this independence as follows: 'accept the independent identity and operational autonomy of the Provider in the provision of the Services under this Arrangement'.

If you have any queries, please do not hesitate to contact me at sarah.anderson1@hse.ie or tel: 087 9423319.

Yours sincerely

Sarah Anderson
