07 April 2025

**Deputy Emer Currie
Dáil Eireann
Leinster House
Kildare Street
Dublin 2**

PQ 12028/25 To ask the Minister for Health the number of persons under the age of 13 who have received their first dental visit under the school dental programme for children between 2020 to date in 2025; and if she will make a statement on the matter.

Dear Deputy Currie,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question, which you submitted to the Minister for response.

The Health Services Executive delivers dental services to children under the age of 16, provided through 17 Dental Areas, all of which continue to provide routine services.

The school dental service provides examination and any necessary preventive and restorative treatment noted at examination. The programme commences with 6th class and follows with 2nd and 4th - depending on available resources. As part of targeting of resources, each dental service maintains a commitment to urgent/emergency treatment for the relief of pain, infection, and the sequelae of trauma.

I wish to advise the Deputy that the data is not available as requested. The tables below provides KPI data on the total number of dental examinations undertaken within the Community Dental Service in years 2020 - 2024 for those who are participating in a targeted programme (target group 6-8yrs of age /1st or 2nd class, target group 11-13yrs of age / 5th or 6th class and other target groups). Latest available data for 2025 is end February 2025 and is presented via HSE Health Regions.

The ability to offer services to each of the school years has been limited due to availability of dental staff.

I trust this information is of assistance to you, but if you require further clarification please do not hesitate to contact me.

Yours Sincerely,

**Anne O'Neill
Assistant National Director, Oral Health**

Appendix 1: KPI Data 2019-2024 - the number of new oral health patients in target groups attending for scheduled assessment
