1st October 2025

Deputy Quaide,
Dáil Éireann,
Leinster House,
Kildare Street,
Dublin 2.

PQ 48155/25 To ask the Minister for Health the number of children and adolescents on waiting-lists in primary care services for occupational therapy, physiotherapy, psychology and speech and language therapy in excess of one year, two years, three years and so on, until the longest duration in years, by health region, in tabular form

- Liam Quaide

Dear Deputy Quaide,

The Health Service Executive (HSE) has been requested to reply directly to you in the context of the above Parliamentary Question (48155/25) which you submitted to the Minister for Health for response.

The HSE is committed to delivering efficient high-quality services to all eligible service users. In 2024, there were over 1.3million patients seen by HSE Primary Care Therapy services. Each Health Region is focused on improving access to care in order to reduce waiting times for patients in the context of resources available.

Whilst the HSE does not report data in the above requested format, the HSE does record the longest Primary Care service wait time for children and adolescents across primary care services. This longest wait time data is attached for your information across occupational therapy, physiotherapy, psychology and speech and language therapy. The data is as of August 2025, being the latest data available at this time. The HSE also has data on wait times in standard intervals, which I have also included.

Appendix 1 – Children’s Longest Wait Times Aug 2025

Appendix 2 - Number of Children Waiting Lists August 2025

I trust this information is of assistance to you.

Seán McArt

General Manager

Primary Care Access & Integration
