

Lung Transplant Recipient Selection

Listing for transplantation dependent on life limiting pulmonary condition.

Completed transplant assessment process and reviewed by transplant pulmonologist and surgeons.

Reviewed and discussed at transplant multidisciplinary team meeting.

Group consensus that recipient is suitable for transplantation.

Organ allocation decision based on the following factors

- Donor/recipient matching
 - Blood group
 - Height/weight
 - Cross matching
 - Primary diagnosis
 - Single versus double lung transplant offer
 - Age

- Clinical status
 1. Clinical urgency
 2. Primary diagnosis
