## **Introduction**

We would like to hear your views on the draft End to End model of care for Asthma. All comments received on this form by the deadline will be considered and used to inform the final clinical guideline.

Clinical guidelines are an important contributor to safe high quality healthcare. Good clinical guidelines help change the process of healthcare, reduce variation, improve outcomes for service users and ensure the efficient use of healthcare resources.

### **Notes:**

1. Feedback received may be edited and/or summarised.
2. This consultation is conducted in line with requirements of the Freedom of Information (FOI) Acts as applicable and Data Protection requirements. Please note your submission may be published under this or in a report on the consultation. This may be on a website or in a document.
3. Submissions which are not attributable to an individual or group will not be considered.
4. Organisations making submissions should be aware of their obligations under the terms of the Regulation of Lobbying Act 2015.

## **Scope of draft clinical guideline**

This guideline is relevant to all clinical staff caring for adult patients and paediatric care in all healthcare settings.

It is designed to guide clinical judgement but not replace it. In individual cases a healthcare professional may, after careful consideration, decide not to follow guideline recommendations if it is deemed to be in the best interests of the patient. Clinical decisions and therapeutic options should be discussed with a senior clinician on a case-by-case basis as necessary and documented in the clinical notes.
