

# R226 MIFI Wireless dongle device

## Step 1

Insert your SIM

Remove back cover

Insert SIM

Open the menu of the device

Press the **Menu button (1)**

Highlight the Wi-Fi Band option (press Menu/Next) twice and press Power/ OK (**button 2**).

- 1 Menu /Next
- 2 Power / OK

- 1 Menu /Next
- 2 Power / OK

In the Wi-Fi Band option select the **2.4GHz** and press **Power/OK button**

- 1 Menu /Next
- 2 Power / OK

Connect to Wi-Fi

Turn on the Wi-Fi on your laptop

For Lenovo: Press the **FN** button of the laptop keyboard + **F8** (icon of the signal tower)

For HP: Press the Wi-Fi button on the top right hand side corner (**when it is on it glows white** – when the Wi-Fi is off it glows orange)

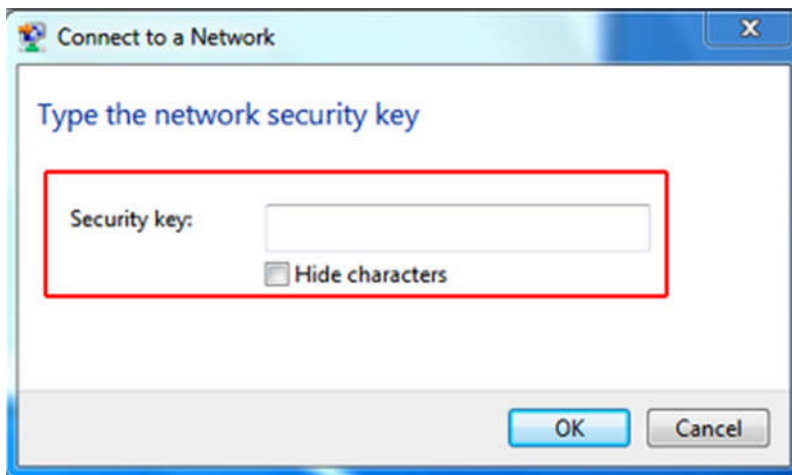

Right click on the network connection icon on the taskbar and select to connect to your Mi-Fi

**The Mi-Fi SSID (network connection name) will be on the card in the box of the Mi-Fi device**

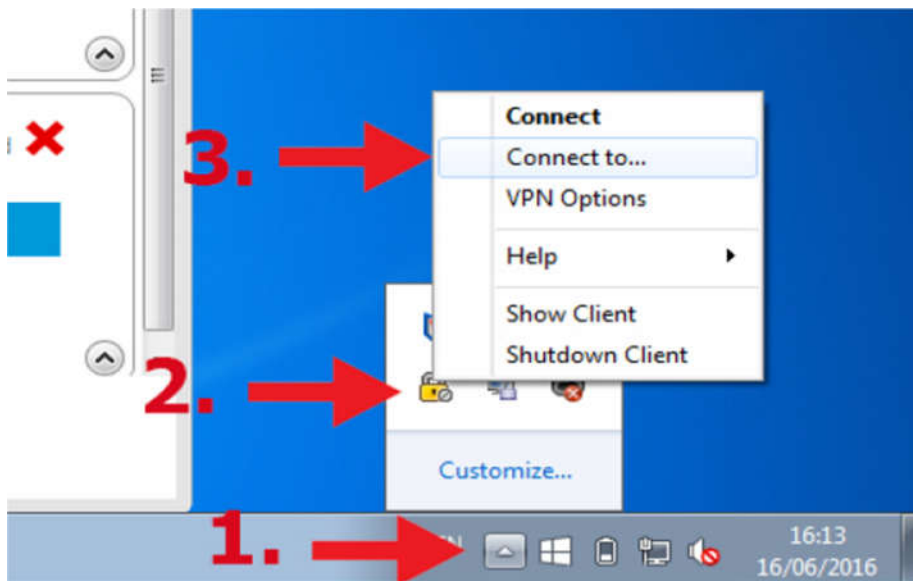

You will be prompted for a password. **You will find the password on the same card in the box of the device**

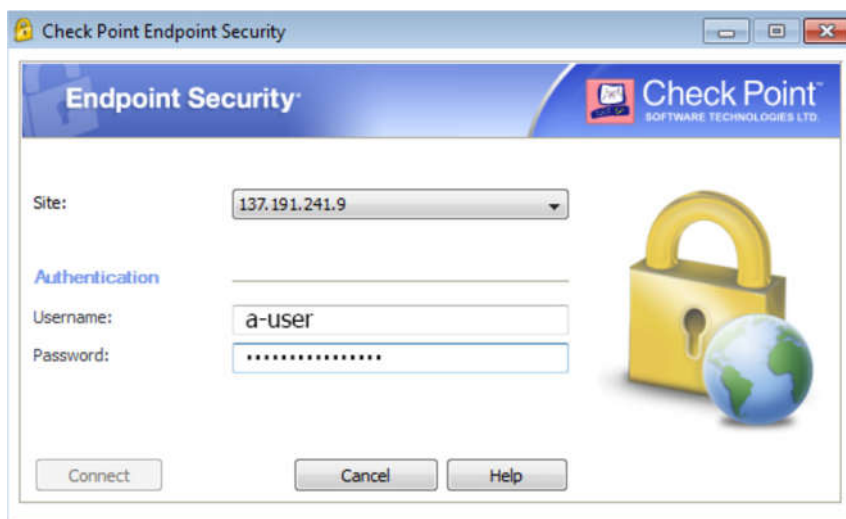

Once you have connected to the Wi-Fi you need to connect to the HSE VPN network through CheckPoint security software.

If the software icon (**yellow padlock**) is not right from the date and time (default location is right hand side bottom corner of the screen), click on the **show hidden icons** arrow (1).

Right click (2) on the yellow padlock icon of the CheckPoint software and select **“Connect to..”** (3)

Enter your VPN login details and click **“Connect”**
