Shelf-Life Extension:

Sanity Hand Sanitizer

On initial production of the Sanity Hand Sanitizer the stability testing validated a 12-month shelf life from the date of manufacture of the product.

Since the initial stability testing phase, EPC have gathered further stability data on the product and can confirm that the stability testing has resulted in the extension of the shelf life of the product from the initial 12 months to 24 months, effective from date of production.

All 75ml tubes and 500ml bottles with corresponding lot numbers as per table below, are approved for shelf extension to 24-month period. This will be an additional 12 months after the currently embossed expiry date on the tube.
