Dear PCH Customer:

**We would like to verify below information:**

Normally the shelf life of our goggles products is 2 years. But this is not saying the function of protection will go away after 2 years, as it has much to do with the storage condition and the circumstance where it's used.

Before usage, the products need to be stored at room temperature, and kept away from solvents, or solvent vapors or any corrosive materials, as these may seriously reduce the impact protection and Anti fog effect provided by the eyewear. With the proper storage as above, it would be fine for the shelf life to be extended to one more year.

**Date: Feb 23<sup>rd</sup>, 2023**

A handwritten signature in black ink, appearing to read 'Sam', is written below the date.

27th March 2023

Dear Colleagues

We have been notified of an extension to the shelf life of a 'Goggle' currently available from HSE via the National PPE Supply Chain, namely "Eyelock" manufactured by Dangyang.

The new expiry date is 12/02/2024. This extension is based on confirmation from the manufacturer that the shelf life can be extended by 12 months provided that they are being stored under correct conditions (i.e. at ambient room temperatures and away from solvents). We are also advised that these products continue to meet the current regulatory requirements for these products.

This information will be made available via [www.hse.ie](https://www.hse.ie).

For procurement related queries for these or other products please contact:
