2. **Building a Culture for Patient Safety. Report of the Commission on Patient Safety and Quality Assurance.**

<https://assets.gov.ie/18845/59ff088cfaea4c4f8c93b6b04fae9762.pdf>

3. **Unequal Chances? Inequalities in Mortality in Ireland**

The study examines inequalities in mortality in Ireland over the period since 2000, focusing on two broad dimensions of inequality: socio-economic status (SES), and ethnicity/country of birth/nationality. An analysis of emerging patterns in relation to COVID-19 mortality is also undertaken. Despite the overall improvement in mortality rates in Ireland in recent decades, the findings in this report highlight a number of groups that are vulnerable to higher mortality rates.

4. **An Introduction to Human Factors for Healthcare Workers**

A simple way to view human factors is to think about three aspects: (1) the job, (2) the individual, and (3) the organisation- and how they impact upon people's behaviour. The application of human factors principles and methods to healthcare has the potential to improve safety, quality, and efficiency.
