

A Systems Approach to the Clinically Deteriorating Patient

#DPIPConference2022

Audience Feedback

Take Home Messages:

- Safety Huddles needs MDT so everyone has a voice
- Data important to embed Critical Care ANP
- IHCA Audit will drive improvement & change
- Implementing ReSPECT will avoid inappropriate CPR
- A whole systems approach = good governance
- Need for shared vision at local level

One of the best conferences I have attended to date

Hugely reassuring momentum for an IHCA

Bigger conference hall so that interested people can attend the conference live. Tickets were sold out like hot buns.

What could be better?

In person preferred option if bigger room possible
More Case Studies
Q&A from online
More frontline experience
More patient / family experience
Poster stands

Would be good to see more bedside nurses encouraged to attend

Very hard to improve, It was excellent. Thanks to everyone involved.

Enjoyed the presentations from front line -3 words to describe what I heard -honesty, integrity and care

Next Year:

- Update on the ANP implementation
- INEWS in Residential Care Settings
- Critical Care outside of ICU
- International experience of EWS
- NCHD & Nurse experience of DP
- More Case Studies: Why things go wrong & actions for Improvement
- What matters to the patient – impact of unrecognised deterioration
- Human Factors
- ReSPECT Update
- VSA Digital INEWS Update
- DP & Sepsis

This has been an amazing conference. Seeing people from different parts of Ireland, Scotland and UK who are working towards the same goal
