TEA TIME SURVEY RESULTS

Thank you to everyone for providing your insightful feedback!!

New time?

- Timing was a primary obstacle for many in being unable to attend. We ask if you could let us know which of these times might suit better:
- 12-1pm, 1-2pm, 4-5pm OR keep as is.
- Vote [HERE](#)

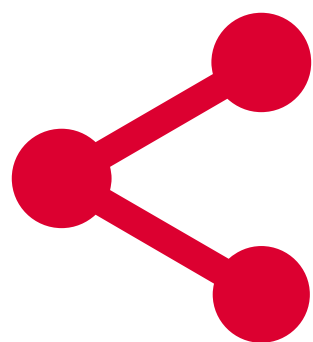

Invite a Buddy

- A fantastic suggestion of inviting a colleague who may be interested in quality improvement was given, even if they are not Q members. We encourage you to invite a Buddy to future sessions!

NEXT TIME!

- Join us Wednesday, May 18th
- Seeking volunteers to co-host!

TIME TO SHARE

HYPO BOX project

Marie Brennan discussed her project HYPO BOX. This is a multidisciplinary project facilitated by the Insulin subgroup on behalf of the Mater Drug Safety Committee. The HYPO BOX is an orange 'First Aid' type box which will be available on wards and outpatient departments. The HYPO BOX contains all the necessary equipment and supplies to treat hypoglycaemia, providing easy access to prompt and effective treatment in diabetes patients. Introduction of HYPO BOXES has been shown to improve the management of hypoglycaemia.

- Reminder that Q-Exchange shortlisting will be announced **May 3rd!** Promotion for shortlisted projects will begin afterwards. Be sure to vote and promote your favourite projects!
