TIME TO SHARE

Healthcare Improvement in Higher Education: Update from Olivia Wall

- Olivia spoke about an online event (31st January) jointly facilitated by Dr. Heather Shearer & Jordan Napier ([linked in title](#)).
- These were informal virtual conversations with about 20 people from universities & academic environments across countries talking about how QI is taught, facilitated & utilised in higher education settings. They were interesting insights on the divergences in how mature QI is understood in both educational and health services.

After today's session I feel

- "Relaxed & happy"
- "Very energised"
- "Energised & connected"
