

31<sup>st</sup> March 2021

Deputy Thomas Gould, TD  
Dáil Eireann  
Kildare Street  
Dublin 2.

**Re PQ: 14284/21**

To ask the Minister for Health the average wait time by facilities for residential rehabilitation or detoxification treatment in March 2020 and 2021, in tabular form.

Dear Deputy Gould,

The Health Service Executive has been requested to reply directly to your above Parliamentary Question which you submitted to the Minister for Health for response. I have examined the matter and the following outlines the position:

The below Table outlines the average wait times for Residential rehabilitation and detoxification treatment for March 2020 and March 2021.

This analysis provides a 'snapshot in time'. Waiting lists are not an indication of need as there are instances where need based priorities cases can access residential and detoxification treatment quicker when there is a cap on places (& waiting lists in operation) available at a particular location. The HSE notes that "service users" can also avail of other community based addiction services during any waiting period. For the deputy's information, a number of COVID-19 related factors have impacted on waiting lists for drug and alcohol detoxification such as reduced capacity in order to comply with public health guidance, restrictions on new entries and closures due to outbreaks. Some services are using their detox facility as a transition phase for 2 weeks for all new entrants (including those accessing rehabilitation programmes), which then impacts on the detox throughput. In addition, there are difficulties carrying out face to face assessments and validating waiting lists as many of the interactions are telephone only.

I trust this information is of assistance to you but should you have any further queries please contact me.

Yours sincerely,

---
