

COVID-19: Advice for the transport/transfer of person

Advice for transport or transfer of person who is suspected to have COVID-19 or for a confirmed case.

With HPSC, we have developed the following for decontamination of transport COVID:

1. Gloves and plastic apron should be worn for cleaning and decontamination, if available
2. Clean and disinfect the environment and furniture after use with a household detergent with bleach
3. Products with these specifications are available in different formats including wipes.
4. Pay special attention to frequently touched sites e.g. door handles and to horizontal surfaces.
5. Waste should be disposed with double plastic bags and bag sealed for disposal
6. Suspect case should maintain good hand hygiene and wear a mask for transport if available.
7. Maintain open window if possible.
