

COVID-19 Vaccine for 5-11years

Why you should vaccinate your 5-11year old

1. Should protect them from getting seriously ill if they get COVID-19
2. Should protect them from paediatric inflammatory multisystem syndrome (PIMS)
3. Should protect them from the risk of developing 'long COVID' symptoms
4. Should protect them from spreading COVID-19 to others
5. They will be less likely to miss school and other activities
